🔧 TOOLS:

- T5 Torx Screwdriver (1)
- iFixit Opening Tools (1)

This document was generated on 2020-11-24 08:13:18 AM (MST).

Step 1 — Front Cover

- Use a screwdriver to remove the four screws from the top and bottom of the camera. Remove the screws securing the lanyard as well.

- Use a T5 Torx bit to secure the exterior decorative cover of the device.

Step 2

- Use a plastic opening tool to detach the case.

This document was generated on 2020-11-24 08:13:18 AM (MST).

Step 3

- Use the plastic opening tool to cautiously pry the casing off of the camera.

Step 4

- Carefully slide the case to the left. Avoid cracking the case on the lens.

Step 5 — Lens

- Remove the screws from the lens cover

Step 6

- Remove the screws from the side metal cover of outer case.

This document was generated on 2020-11-24 08:13:18 AM (MST).

Step 7

- Gently remove the Lens from the housing.

To reassemble your device, follow these instructions in reverse order.
