---

 **TOOLS:**

- [Phillips #0 Screwdriver](#) (1)
  - [iFixit Opening Tools](#) (1)
-

## Step 1 — LCD Screen

- Use a PH0 screwdriver to remove four screws on the right side, three screws on the bottom, and four on the left side to take off the rear plate.

## Step 2

- Remove the three screws holding the LCD screen in place.
- Replace with new screen.

### Step 3 — Flash Mechanism Latch Spring

- Remove the two screws from underneath the flash mechanism.
- Remove the two screws placed on the right and left sides of the camera.

### Step 4

- Pry the top of the camera off using the given tool

## Step 5

- Remove two silver plated screw from under the top of the camera, under the flash.

## Step 6

- Remove the rectangular plastic piece.

## Step 7

- Insert new spring.
- Replace the plastic piece.

To reassemble your device, follow these instructions in reverse order.
