 **TOOLS:**

- [Phillips #2 Screwdriver](#) (1)
 - [Paper Clip](#) (1)
 - [iFixit Opening Tools](#) (1)
-

Step 1 — Chassis

- Insert a paper clip into a small hole on the right side of the faceplate below the disc tray.
 - ⓘ There may be resistance, do not be afraid to use force.
- The tray should then pop open.
- Pull out the tray so that it is fully extended.

Step 2

- Use a plastic opening tool to push the three tabs located on the right, left, and bottom side of the outer chassis to loosen the faceplate off.

Step 3

- Pull the faceplate off the chassis.
- ⚠ Do NOT pull the faceplate all the way off the disc tray, because doing so can cause damage to the faceplate.
- ⓘ There may be resistance, do not be afraid to use force.

Step 4

- Using the Phillips Head #2 screwdriver, unscrew the two 8.5 mm screws located on the bottom back of the chassis.

Step 5

- Remove the bottom plate by lifting it off the device.

Step 6

- Turn the device over.
- Remove the top plate by pulling the sides and lifting the plate off.

To reassemble your device, follow these instructions in reverse order.
