Step 1 — Flash Button

- Open the battery cover and remove the AA batteries from the camera if any are inserted.
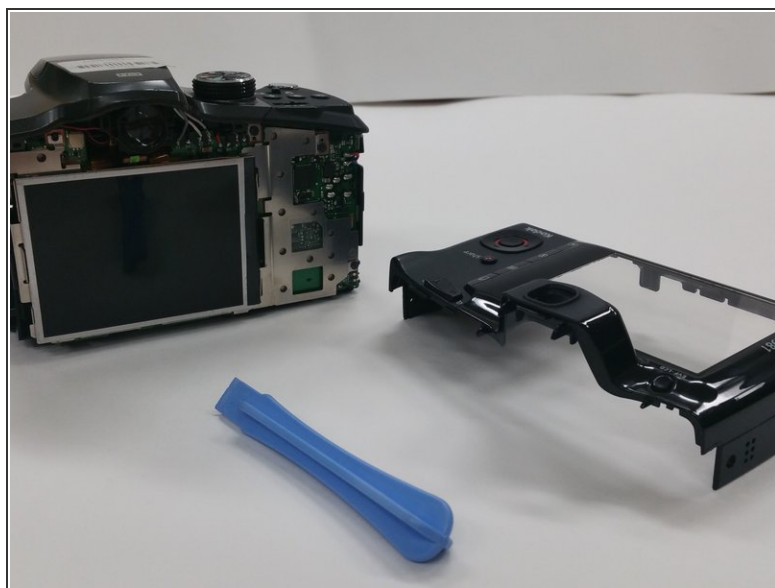

Step 2

- Remove screws using a [00 Phillips-Head](#) screwdriver:
  - Eight (8) **3mm** screws on the lower portion of the camera
    - Four (4) on the bottom of the camera
    - Four (4) on the inside of the battery cover
 - Four (4) **6mm** screws on the sides of the camera (two on each side)

Step 3

- Start from a corner and gently remove the bottom of the camera.
  - (i) The cover will easily lift off, so not much pressure is required.

Step 4

- Use a Plastic Opening Tool to remove the back of the camera

Step 5

- Remove the four (4) **3mm** screws attaching the LCD screen to the circuit board.

- Use [Tweezers](#) to carefully detach the ribbon cable
  ⚠ Use extreme caution on this step, as the ribbon cable is very fragile and can rip very easily.

Step 6

- Open the flash compartment and remove two (2) **3mm** screws.

Step 7

- Use a Plastic Opening Tool to carefully remove the top of the camera.
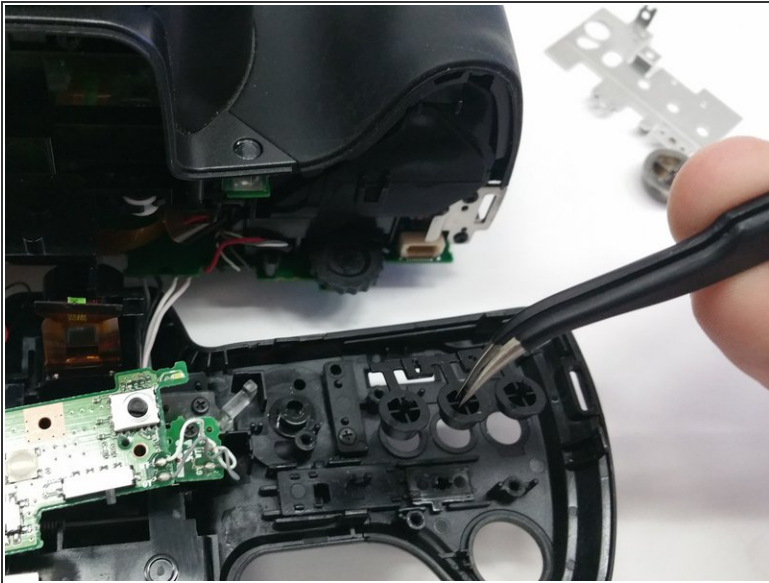

⚠ Use caution when removing the top of the camera

Step 8

- Remove four (4) **3mm** screws from the circuit board underneath the button set.
  - Gently move the circuit board aside.
- Gently move aside the metal sheet.
