

RCA RCT6272W23 Speaker Replacement

In this guide, you will learn how to replace...

Written By: Stephen Radachy

INTRODUCTION

In this guide, you will learn how to replace the speaker on your device.

TOOLS:

Phillips #00 Screwdriver (1)

iFixit Opening Tool (1)

Soldering Iron (1)

Spudger (1)

Step 1 — Case

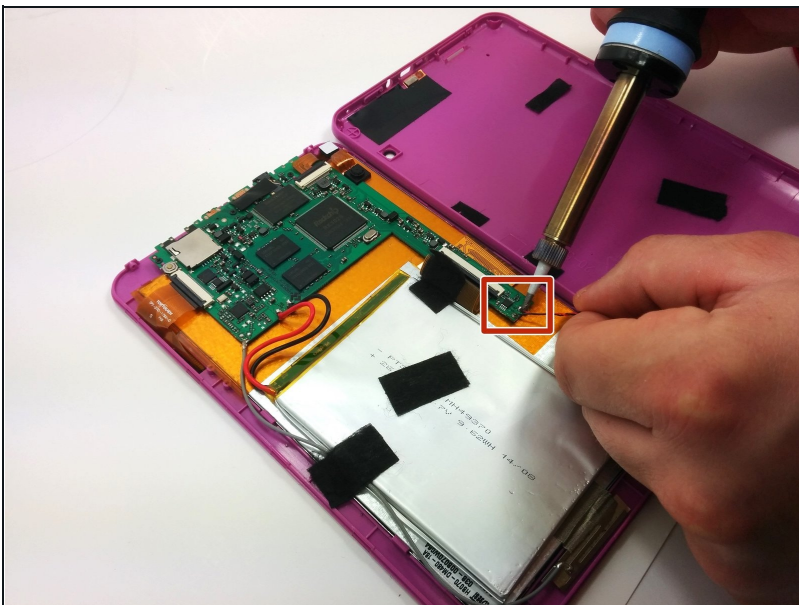

- Use a Phillips #00 screwdriver to remove both 4.1 mm screws at the top of the device which hold it together.

Step 2

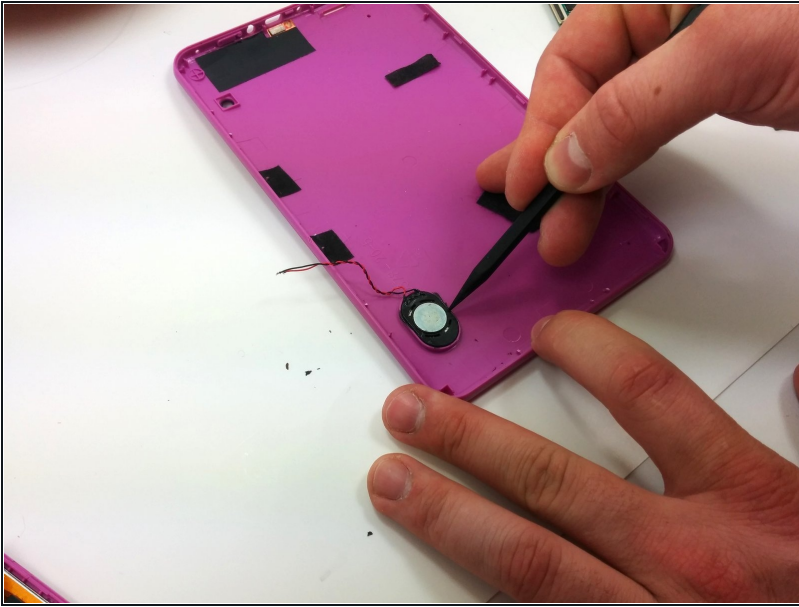

- Press the plastic opening tool into the space between the front and back portions of the case.
- Run it along the perimeter of the device to unhook the plastic tabs.
- Gently pull both sides apart.
⚠ The speaker is connected to the back cover, so be careful when separating.

Step 3 — Speaker

- Remove the soldered wire connections to the speaker.
⚠ Soldering irons can cause burns and severely damage your device. If in doubt, pause and think about it.
- ① For more information about soldering, check out this [guide](#).

Step 4

- Pry the speaker gently out of its plastic enclosure using a spudger.

To reassemble your device, follow these instructions in reverse order.
