Step 3

● Remove SD card on top of device by pushing and then releasing.
Step 4

● Carefully remove the back cover using the spudger against the grooves along the sides of the iPAQ.
Step 5

- Using the plastic opening tool, carefully detach the yellow ribbon from the connector pins to separate the device into two halves.

Step 6

- Using a heating pad or blow dryer, heat the back of cover until warm.

- The glue holding in battery should now be loosened.

- Use plastic opening tool to remove battery from the back cover.

|

Step 7

- Once the old battery is removed, scrape off the old adhesive from the device backing with the prying tool.

- To attach the new battery, apply an adhesive to each corner of the backing where the battery sits and place the device into the backing.

- Allow the adhesive to set for half an hour

To reassemble your device, follow these instructions in reverse order.
