

MacBook Pro 15" Core Duo Model A1150

Memory Door Replacement

Written By: iRobot

INTRODUCTION

Removing a few screws will remove this part and allow access to your RAM.

TOOLS:

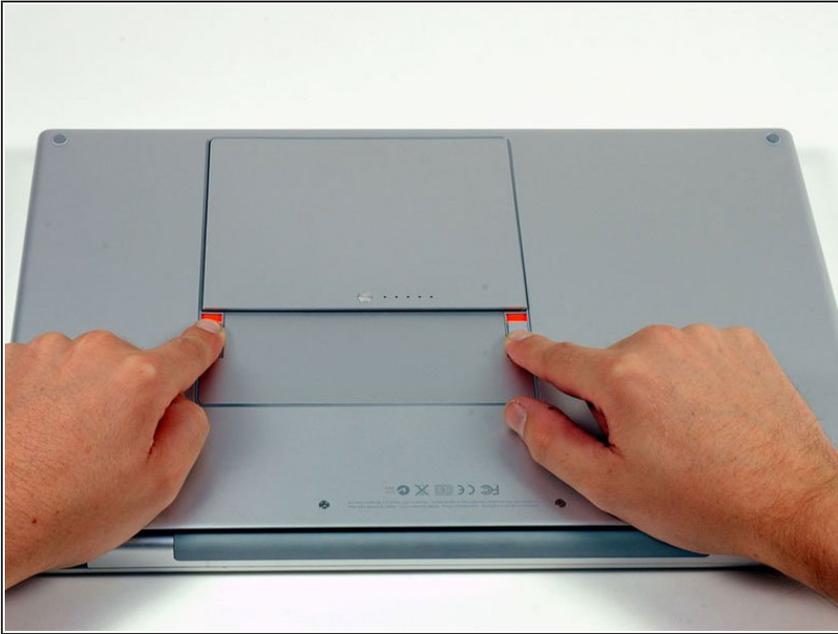

- [Phillips #00 Screwdriver](#) (1)

PARTS:

- [MacBook Pro 15" Memory Door](#) (1)

Step 1 — Battery

- Use your fingers to push both battery release tabs away from the battery, and lift the battery out of the computer.

Step 2 — Memory Door

- Remove the three identical Phillips screws from the memory door.
- ☑ Make sure to record which sets of screws came from where. This will help when re-assembling.

Step 3

- Lift the memory door up enough to get a grip on it, and slide it toward you, pulling it away from the casing.

To reassemble your device, follow these instructions in reverse order.
