Step 1 — Latch Side Cover

● Remove the two 3mm (1/8") black screws from the side cover using a #00 Phillips screwdriver.

Step 2

● On the bottom, remove the 6mm (13/64") screw with the #00 Phillips Screwdriver.

● Pry up the panel; starting from the front/bottom corner, as indicated.

   ● There's a concealed lip, under the opposite edge.

Step 3 — Disassembling Canon EOS Rebel XS Front Cover

- Remove three medium length screws from the bottom of the camera
Step 4

- Remove the two medium length screws on the front panel of the camera above the lens mount.

- Once you done, you may use the Spudger to panel from non-grip side.

- (i) If you start on the grip side, it will be more challenging to loosen the panel.

Step 5 — Back Cover

- Remove the three long black screws from the bottom using a #00 Phillips screwdriver.
- Use tweezers to lift the panel.

Step 6

- Once you have detached the back cover, use a pair of tweezers to lightly pull on strap found connecting the back cover to the camera.
Step 7 — Top Panel

- Remove the following ribbons with the tweezers by gently pulling on them.

- Remove the three black screws, near the eye piece, using the Phillips Screwdriver.

Step 8

- Remove the cable heads attached on the front side of the camera next to the lens mount.

⚠ Be gentle when puling wires lose, use the tweezers to remove the wires.
