INTRODUCTION

Use this guide to repair a broken battery door. The battery door on this model tends to break off due to a weak plastic hinge.
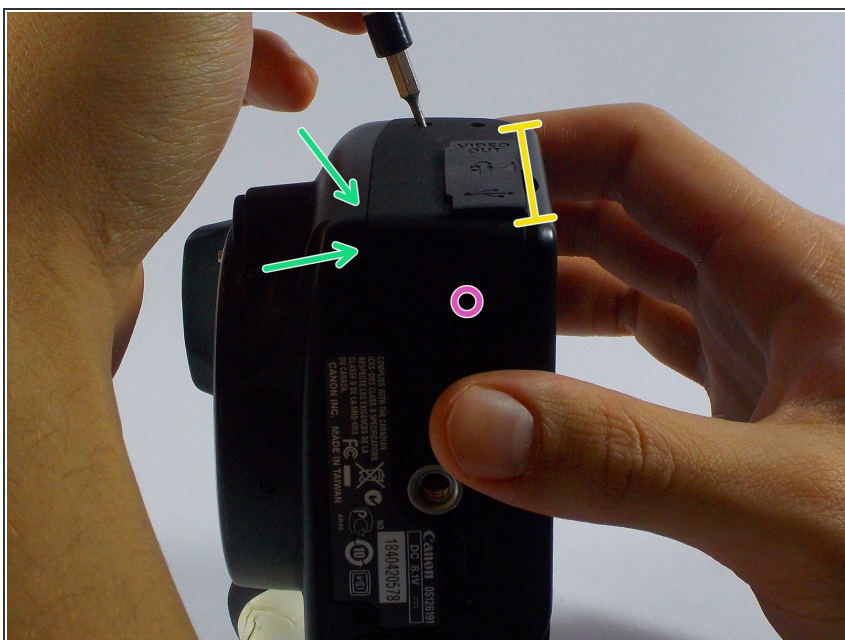

🔧 TOOLS:

- Phillips #00 Screwdriver (1)
- Spudger (1)

Step 1 — Latch Side Cover

- Remove the two 3mm (1/8") black screws from the side cover using a #00 Phillips screwdriver.

Step 2

- On the bottom, remove the 6mm (13/64") screw with the #00 Phillips Screwdriver.

- Pry up the panel; starting from the front/bottom corner, as indicated.
  - There's a concealed lip, under the opposite edge.

Step 3 — Disassembling Canon EOS Rebel XS Front Cover

● Remove three medium length screws from the bottom of the camera

Step 4

● Remove the two medium length screws on the front panel of the camera above the lens mount.

● Once you done, you may use the Spudger to panel from non-grip side.

ⓘ If you start on the grip side, it will be more challenging to loosen the panel.

Step 7

● Remove the two 5mm (.20in) long silver screws securing the grip to the camera using a #00 Phillips screwdriver.

Step 8

● Use the spudger tool to carefully pry the grip from the rest of the camera.

Step 9

- Once the grip is loose, use your fingers to remove it from the camera.

Step 10 — Battery Door

- Remove the 4.8mm (.19in) long silver screw from the inside of the grip.

Step 11

- Remove the hinge of the battery door from the inside of the grip.

- (i) Our sample camera's battery door was broken off of its hinge. Picture two shows an example of a battery door that is not broken.

To reassemble your device, follow these instructions in reverse order.
