

VTech MobiGo Touch Learning System Buttons Replacement

How to remove and replace the two grey buttons next to the screen.

Written By: Daniel Kresge

INTRODUCTION

This guide show users how they can replace the buttons of the device.

TOOLS:

- Magnetic Project Mat (1)
- Metal Spudger (1)
- iFixit Opening Tools (1)
- Screwdriver (1)

Step 1 — Case

• Remove the battery covers and the four batteries.

Step 2

- Remove the four plastic caps with a metal spudger to expose the 6.0 mm Philips JIS #0 case screws.
- Remove the eight 6.0 mm JIS #0 case screws.

Using a plastic opening tool, separate the two pieces of the case carefully.

Step 4 — Disassembling VTech MobiGo Touch Learning System Screen Enclosure

 Remove the three 4.0 mm Philips J0 screws holding the "L" shaped brackets in place.

• Remove the three "L" shaped brackets and the spring.

Step 6

• Flip the device over and remove the three 4.0 mm Philips J0 case screws.

- Separate the front and back of the case.
- (i) Use a plastic opening tool if necessary.

Step 8 — Buttons

• Remove 6 (3.8 mm Philips J0) screws holding the buttons in.

• From here you can remove and replace the buttons.

To reassemble your device, follow these instructions in reverse order.
