Step 3 — Back Face

- Remove 2-3.4 mm screws that secure the back panel using a Phillips #000 screwdriver.

- Remove 4-4 mm screws on the left and right sides of the camera using a Phillips #000 screwdriver.

Step 4

- Remove 2-4 mm screws that secure the bottom of the camera using a Phillips #000 screwdriver.
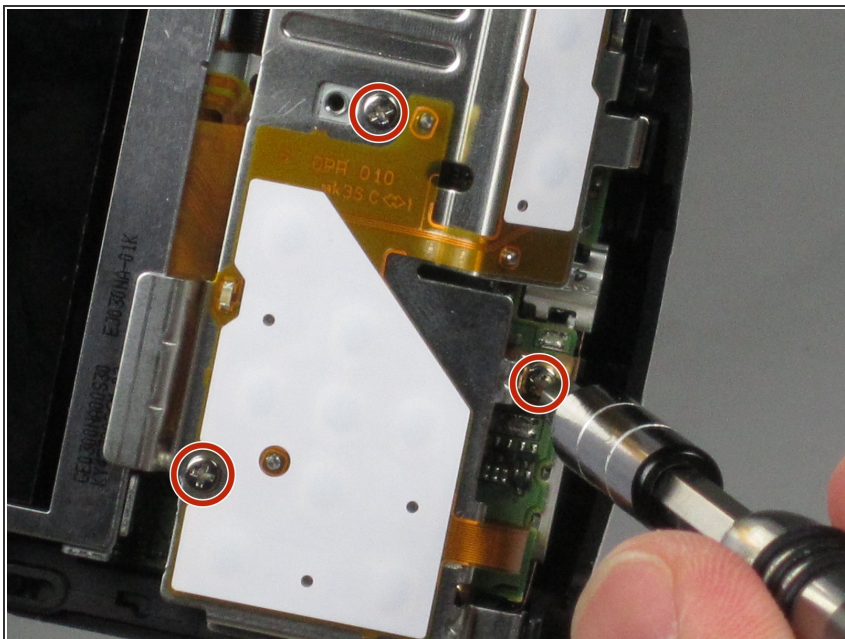

Step 5

- Pull back the rubber facing to access the A/V and HDMI output compartment.

- Remove 1-3.4mm screw inside the compartment using a Phillips #000 screwdriver.

Step 6

- Once all screws are removed, pull the back facing off with your fingers.
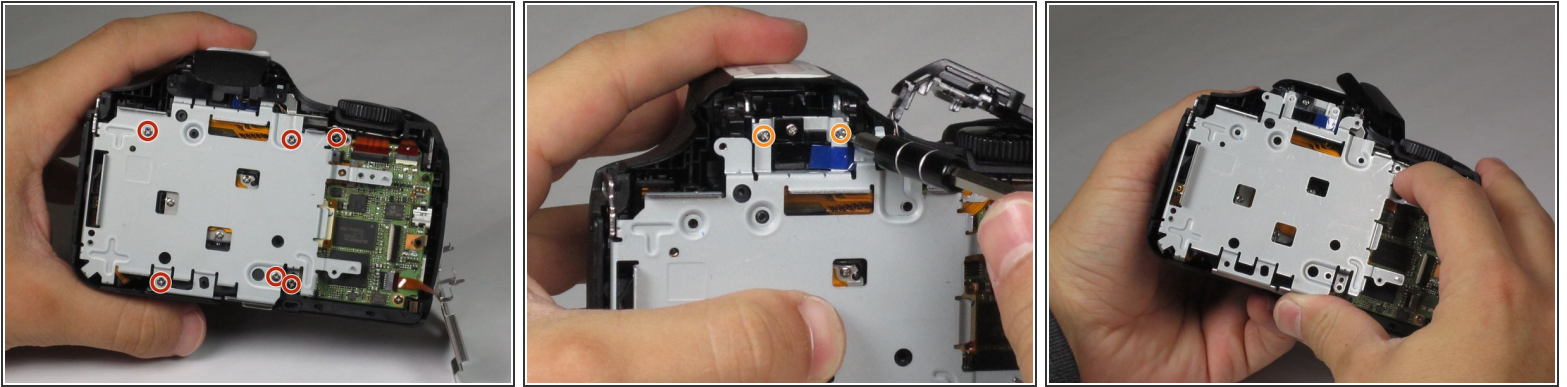

Step 7 — LCD Screen

- Remove 3-4.4 mm screws that secure the small metal plate using a Phillips #000 screwdriver.
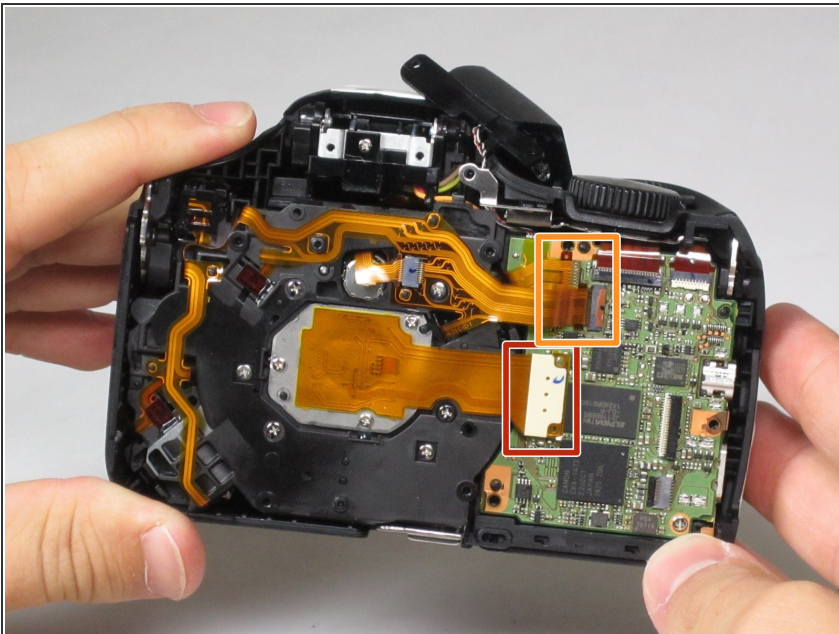

Step 8

- Carefully pop out the LCD screen with your fingers.
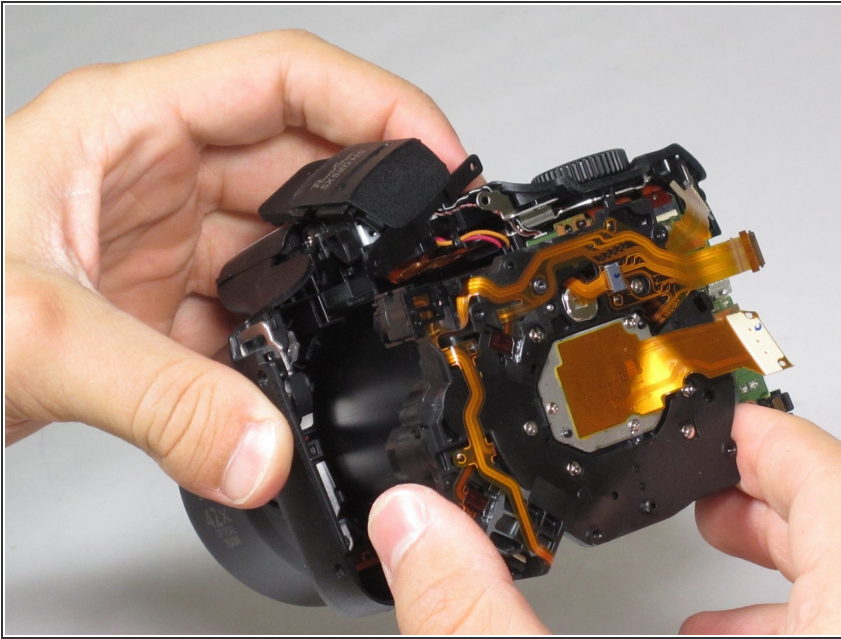

Step 9 — Metal Plate

- Remove 6-4.4 mm screws that secure the metal cover using a Phillips #000 screwdriver.

- Remove 2-2.5 mm screws that secure the back panel using a Phillips #000 screwdriver.

- After all 8 screws are removed, pull the metal plate out with your fingers.

Step 10 — Lens

- Unlcip the large cable by pulling up on the metal part with your finger.

- Slide out the 2 smaller cables with your fingers.

Step 11

- Lift up the lens by grabbing the sides with your fingers.

To reassemble your device, follow these instructions in reverse order.
