

How to Repair the Electrical Connections on a Little Tikes Motorized Bubble Mower.

Reattaching electrical wires on a Little Tikes Motorized Bubble Mower.

Written By: John Hiller

INTRODUCTION

Using this guide you can fix this toy in 15-20 minutes without having to buy a new one. There are several tools you will need to fix this Little Tikes Bubble Mower. You will need a Philips screw driver size PH1, and a soldering tool. (If you don't know how to solder, look at iFixit's [How to Solder and Desolder connections](#).)

TOOLS:

- [Soldering Iron](#) (1)
 - [Phillips #1 Screwdriver](#) (1)
 - [Phillips #2 Screwdriver](#) (1)
-

Step 1 — How to Repair the Electrical Connections on a Little Tikes Motorized Bubble Mower.

- Start with a flat, open space to work.

Step 2

- Unscrew these three 1.2 mm screws.

Step 3

- Remove the Bubble Sprocket from the motor.

Step 4

- Unscrew these four 1.2mm screws holding the plate on.

Step 5

- Remove the plate.

Step 6

- Connect the red wire to the top right pin.

Step 7

- Solder the Red wire to the metal pin.

⚠ (Warning Soldering is very hot!)

Step 8

- Connect the yellow wire to the bottom right pin.
- Solder the yellow wire to the bottom right pin.

⚠ (Warning Soldering iron is very hot!)

Step 9

- Replace the plate over the wires.

Step 10

- Put four 1.2 mm screws for the plate back into place.

Step 11

- Put three 1.2mm screws for the motor back into place.

Step 12

- Insert the Bubble sprocket onto the motor.

Step 13

- You are now finished!
