Zoomer Dino Boomer Back Button Replacement

If the back button on Zoomer Dino Boomer breaks or stops working, this guide can be used to replace the button.
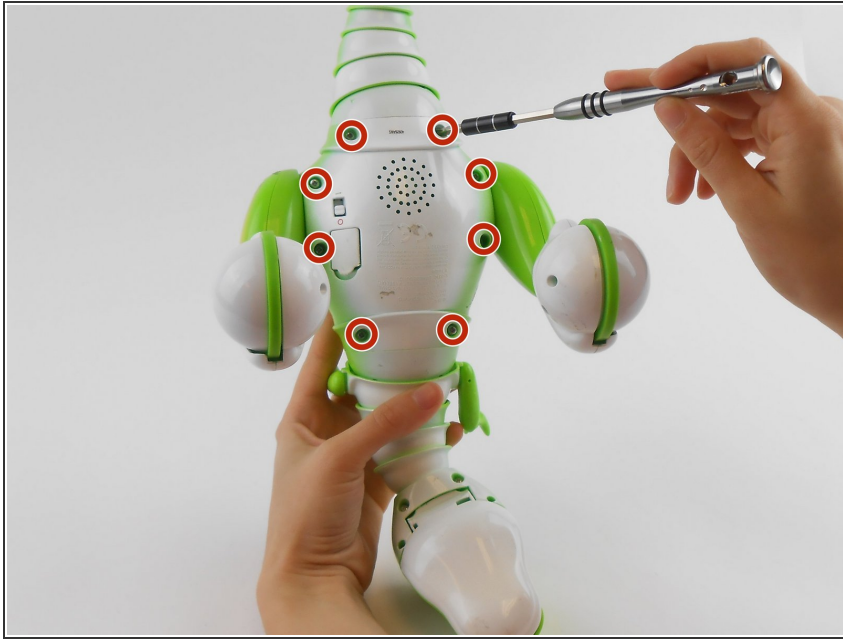

Written By: Lauren Mannix

INTRODUCTION

This guide involves taking apart the Zoomer Dino Boomer in order to disconnect the sensor button from the main circuit board for replacement.

🔧 TOOLS:

- Phillips #1 Screwdriver (1)
- Spudger (1)
- Tweezers (1)

Step 1 — Back Cover

- ⓘ Power off Zoomer Dino Boomer before disassembly.

- ● Remove the eight 9.3mm Phillips #1 screws.

Step 2

- ● Turn dinosaur over and hold upright.

- ● Use the spudger to pry apart the back cover from the remainder of the Zoomer Dino Boomer.

- ⚠ Be gentle while removing the back cover. The back cover of the Zoomer Dino Boomer is still connected to the electronic system by a wire.

Step 3

- Disconnect the wire that connects the back cover of the dino to the main circuit board by carefully pulling on the orange wire connector with tweezers.

- Remove back cover.

- ⓘ If you are having difficulty removing the connector from its socket, push in the small tabs on the side of the connector with the tweezers. This step may take some work.

- ⚠ Do not damage the wires or circuit board.
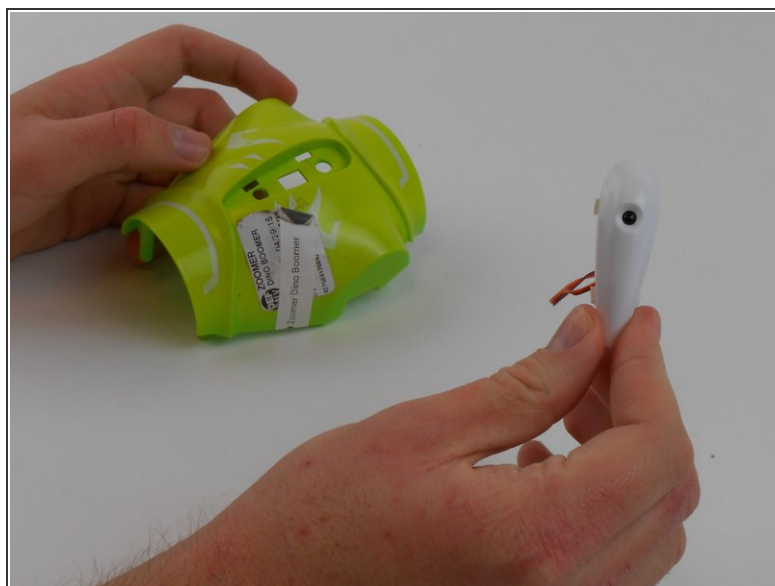

Step 4 — Back Button

- Where the button is largest, squeeze the two white tabs together.

Step 5

- Push in the white circular piece between these tabs as far as it will go.

Step 6

- Where the button is smallest, squeeze the two white tabs together and press the circular tab in-between them until the button comes loose.

- Remove the back button.
