# Lenovo Yoga 2 Pro Trackpad Replacement

This guide will walk you through the replacement of your computer's trackpad. It requires fairly little technical knowledge and mechanical skills.

Written By: Thomas Simko

INTRODUCTION

The trackpad is the component that controls the movement of the cursor on the screen with respect to the gestures made by your fingers. In this guide you will be instructed how to remove the trackpad of your laptop. Whether it's completely broken or just dirty from eating too many Cheetos, this guide has you covered.
🔧 TOOLS:
- Phillips #00 Screwdriver (1)
- Tweezers (1)

⚙️ PARTS:
- Replacement trackpad (1)

Step 4

- Using either tweezers or your fingers, disconnect the black battery cable by pinching either side of the connector and pulling towards the battery.
Step 5
- Remove the battery from the computer.
Step 6 — Trackpad

- Using a Phillips #00 screwdriver, remove the eight 1/8" screws surrounding the trackpad.
Step 7

- Using a sharp tool such as tweezers, lift up the black cover that is on top of the ribbon cable.

Step 8

- With tweezers, gently slide the ribbon cable out from under the connector.

Step 9

- Lift the trackpad out of the computer.

To reassemble your device, follow these instructions in reverse order.
