

Lenovo Yoga 2 Pro SSD Replacement

In this guide we will replace the solid state drive. This guide applies for replacements and upgrades.

Written By: Thomas Simko

INTRODUCTION

This guide will walk you through the replacement of the solid state drive in your Lenovo Yoga 2 Pro. The solid state drive holds all of the data on your computer. Because of this, one should still be weary of potential dangers of disposing of the drive incorrectly. Individuals could still possibly recover the data off of the drive. Please use caution when disposing of the solid state drive.

TOOLS:

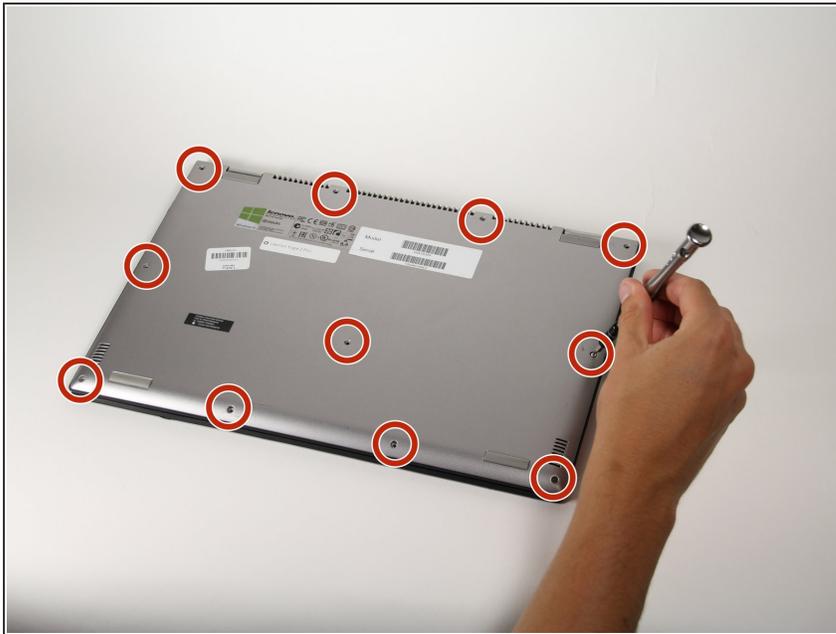

- [Phillips #00 Screwdriver](#) (1)

PARTS:

- [Lenovo Miix 2 and Yoga 2 Pro 256 GB SSD](#) (1)

Step 1 — SSD

- ★ Please ensure that the laptop is turned off before beginning.
- Using a Phillips #00 screwdriver, remove the eleven 1/4" screws from the back of the laptop.

Step 2

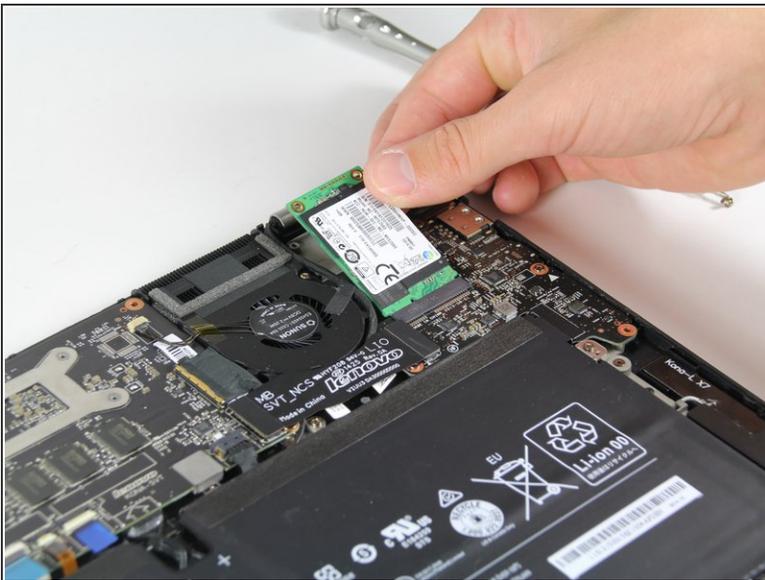

- Gently lift off the back cover.

Step 3

- Navigate to the top right corner of the laptop and locate the solid state drive next to the fan.
- Using a Phillips #00 screwdriver, remove the one 3/16" screw from the top left corner of the solid state drive.
- ⓘ The solid state drive will lift up after you remove the screw.

Step 4

- To remove the solid state drive, gently slide it away from the battery and towards the hinges.

To reassemble your device, follow these instructions in reverse order.
