INTRODUCTION

This guide will help you safely access the inside of your Lenovo A8 without fear of damaging any of the components or the exterior.
🔧 **TOOLS:**

Metal Spudger (1)
Tweezers (1)
Phillips #000 Screwdriver (1)

Step 1 — Removing the Back Panel

- Place the tablet face down on a soft, stable surface that will protect the screen.

- Next, Scrape off the seal over the screw in the back of the tablet with a Metal Spudger.

- Use the Phillips #000 Screwdriver to remove the M1.4 × 2.5 screw.
  - ⓘ If the seal covering the screw has already been removed, please proceed to the next step in the process.

  - ⓘ As the screw is small, you may wish to extract it using a pair of tweezers.

Step 2

- Starting on the side, work your way around the the tablet to pop off the back cover. You will want to utilize a metal Spudger for this.

ⓘ Some force may be required initially to pry the back cover off.

ⓘ Note that the button tabs for this device are loose inside the case and will fall out when opening.

To reassemble your device, follow these instructions in reverse order.
