

Dell Vostro 1320 Screen Replacement

Replace the screen if it is no longer responding.

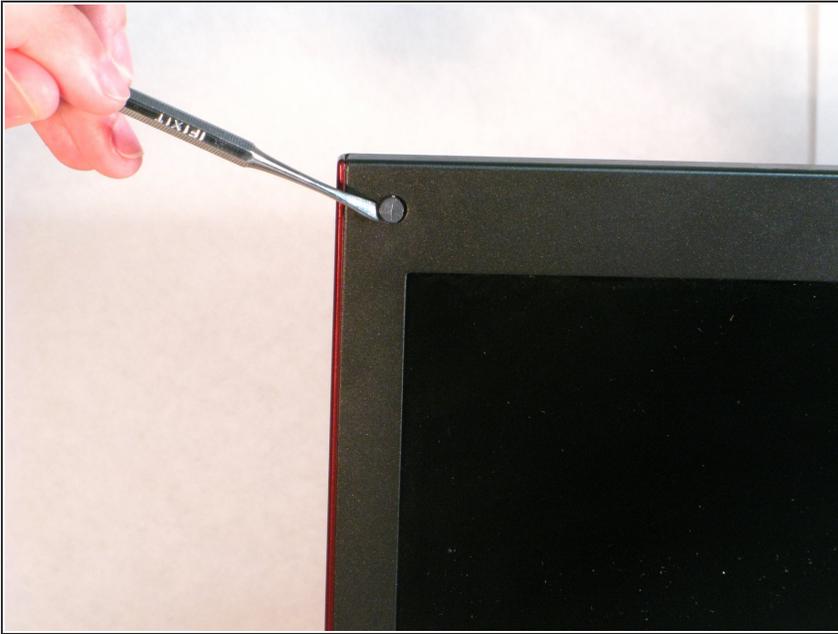

Written By: Christie Lloyd

 **TOOLS:**

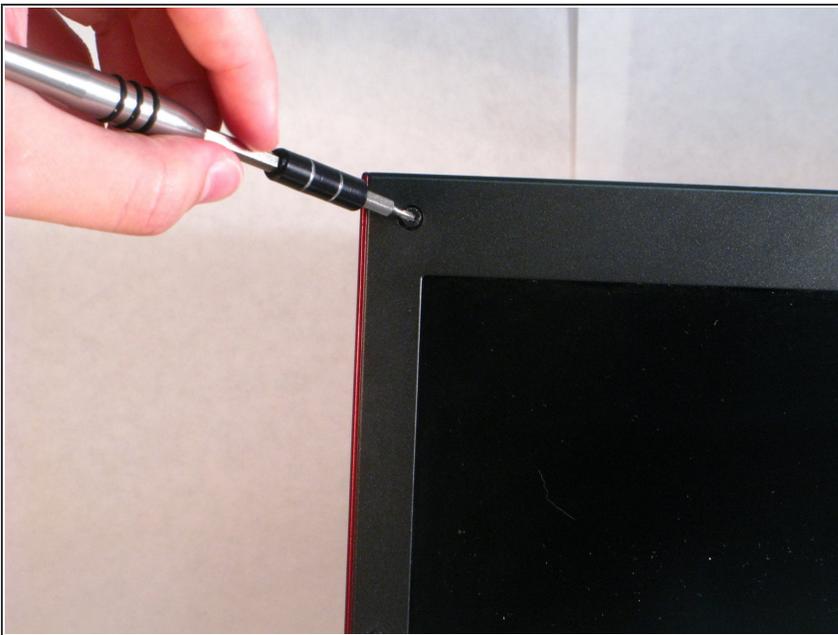

- [64 Bit Driver Kit](#) (1)
 - [Spudger](#) (1)
-

Step 1 — Screen

- Take screw covers off with a metal spudger

Step 2

- Take the six screws out with the bit driver.

Step 3

- Pop the black plastic panel off with the metal spudger. There are three spots where you should leverage it so that the panel does not break.

Step 4

- Remove the plug on the bottom of the screen.

Step 5

- Remove the two screws on the bottom of the computer screen.

Step 6

- Remove the tape and the LCD plug/connector from the back of the screen.

Step 7

- Remove the three screws on the left and right of the screen.

Step 8

- Remove the screen from the metal side frames.

To reassemble your device, follow these instructions in reverse order.
