INTRODUCTION

Replacing the DVD drive is easy to do. Before attempting to remove the DVD drive, remove the battery to avoid damaging the laptop.

TOOLS:

-

Step 1 — Battery

- Turn over laptop.
- Switch open the left battery lock.
- ⓘ If you are replacing inner components of the laptop, it is recommended to remove the battery first to avoid damage to the laptop.

Step 2

- Hold the right battery lock open with one hand while removing the battery itself with the other.

Step 3 — Back Panel

- Loosen the five Philips screws that secure the panel.
- ⓘ The screws do not actually fully remove from the panel. Loosening them as much as you can will be enough to disconnect them from the laptop.

Step 4

- Prop open the cover with a plastic opening tool.

⚠ If the cover does not come off easily, do not force it. Make sure all screws are loosened.

Step 5 — DVD Drive

- Unscrew the one 4 mm Phillips screw that is securing your DVD drive to the frame.

Step 6

- Grab your DVD drive and pull outwards.

To reassemble your device, follow these instructions in reverse order.
