INTRODUCTION

After powering the computer up, if it appears that your profile has been deleted or you get messages about the system detecting a 'critical error', then there may be a problem with the hard drive. Following the instructions in this guide will allow you to remedy this problem by replacing the hard drive.
TOOLS:

- Anti-Static Wrist Strap (1)
- Phillips #0 Screwdriver (1)

PARTS:

- Toshiba Satellite C650D Replacement Hard Drive (1)

Step 1 — Battery

- Unplug the laptop and turn it off.

- Flip the laptop upside down.

- Locate the battery on the underside of the laptop.

Step 2

- Push the two latches away from the battery.

Step 3

- Slide the battery away from the laptop.

- Locate the serial number on the battery to order a replacement.

Step 4 — Hard Drive

- Remove the one 5.0mm Philips #0 screw that holds down the panel covering the hard drive.

Step 5

- Pull off the panel.

Step 6

- Remove the one 3.0mm Philip's #0 screw holding the hard drive in place.

Step 7

● Slide the hard drive out.

To reassemble your device, follow these instructions in reverse order.
