### TOOLS:

- [Heat Gun](#) (1)
  - [iFixit Opening Picks set of 6](#) (1)
  - [T6 Torx Screwdriver](#) (1)
  - [Tweezers](#) (1)
-

## Step 1 — Back Cover

- Switch off the phone.
- Remove the battery and any inserted SIM and memory cards.
- Use a screwdriver Torx T6 and remove the 4x black screws.

## Step 2

- There are several plastic locking clips hold the back cover to the frame.
- Use a tool with a sharp edge to unlock them and a plastic tool to separate the back cover.

### Step 3 — Logic board

- Unhook:
  - the touch screen flex cable
  - the LCD Display flex cable
- Use a plastic tool lift up and remove the Logic board.

### Step 4

- This is the logic board / main board - a front and rear view.

## Step 5 — LCD Display

- The Display metal shield is locked to the frame by 4x locking clips.
- Use a tool with a sharp tip and carefully unlock them and remove the shield.

## Step 6

- The display is stuck to the touch screen glass with a double-sided adhesive tape.
- Use a hair dryer or hot air gun and warm the glass to make the adhesive softer.
- ⚠ Distort the frame a little and use a thin plastic tool to separate the display from the frame.

## Step 7

- The display is very fragile, do the separation very carefully.

## Step 8 — Touch screen Glass Only

- Put some transparent scotch tape to prevent the glass from shattering.
- Warm the glass for a minute to make adhesive softer.
- Start the separation from the middle of the frame, where the contact area is smaller.

## Step 9

- When you finished with the separation the glass, clean the frame from the old adhesive.
- Install the new touch screen and start to reassemble the device.

## Step 10

- **That's all.**

To reassemble your device, follow these instructions in reverse order.
