

Wen 2307 Front Panel Replacement

Remove the top panel of the Rotary tool in order to access its internal components.

Written By: Sergio Palacio

INTRODUCTION

This guide is mandatory in order to replace other parts of your rotary tool.

TOOLS:

- [Phillips #2 Screwdriver](#) (1)
-

Step 1 — Front Panel

- Unscrew the locking sleeve.

Step 2

- Remove the hanging clip.

Step 3

- Unscrew the six 8mm PH2 screws.

Step 4

- While pressing the spindle lock button, unscrew the collet nut and remove it along with the brass collet.

Step 5

- To remove the front panel, pry the device apart while holding the device with the other hand.
- ⓘ The front panel should come out easily.

To reassemble your device, follow these instructions in reverse order.
