Step 5

- Fold the lid down in order to access and remove the final M3 x 4mm screw using your Philips Head Screwdriver.

Step 6

- Use the plastic opening tool to pry the back and front casings of the camera apart.

- Once pried apart use your hands to pull off the back plate of the camera.

- You will need to apply a little bit of force to remove the back plate.

Step 7

- Once the back plate is removed twist the battery cover clockwise and it should easily dislodge.

To reassemble your device, follow these instructions in reverse order.
