

Leapfrog My Own Leaptop Speaker Replacement Guide

In depth guide on how to properly access and replace the speaker on a Leapfrog My Own Leaptop children's device.

Written By: Jonathan Fitzer

INTRODUCTION

This guide will show the user how to access and clean or replace the speaker in the Leapfrog My Own Leaptop.

TOOLS:

- [Phillips #1 Screwdriver](#) (1)
 - [Plastic Opening Tool](#) (1)
 - [Soldering Iron](#) (1)
-

Step 1 — Battery

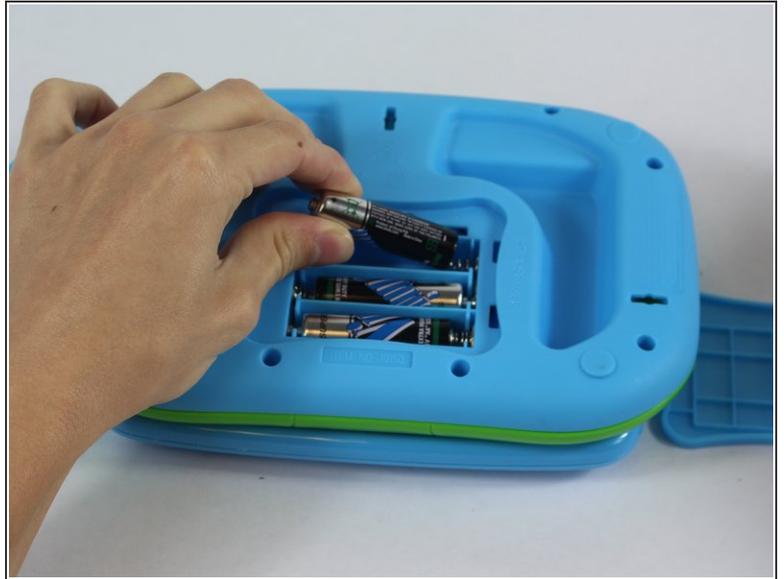

- Flip over device so that back portion of the device is facing you.

Step 2

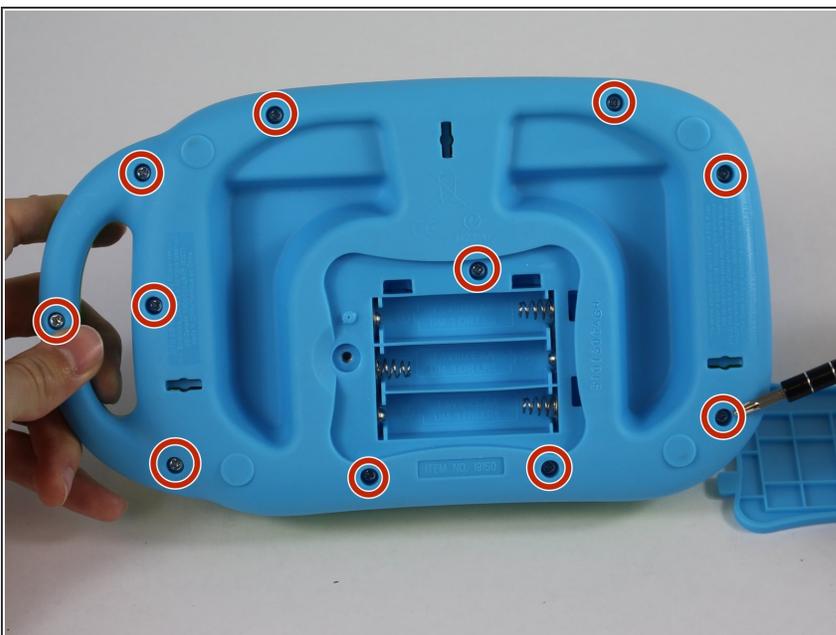

- Unscrew the one 10mm screw that holds the battery cover in place with a PH1 Phillips head screwdriver.
- ★ Please note that the screw cannot be removed as it is attached to the battery cover.

Step 3

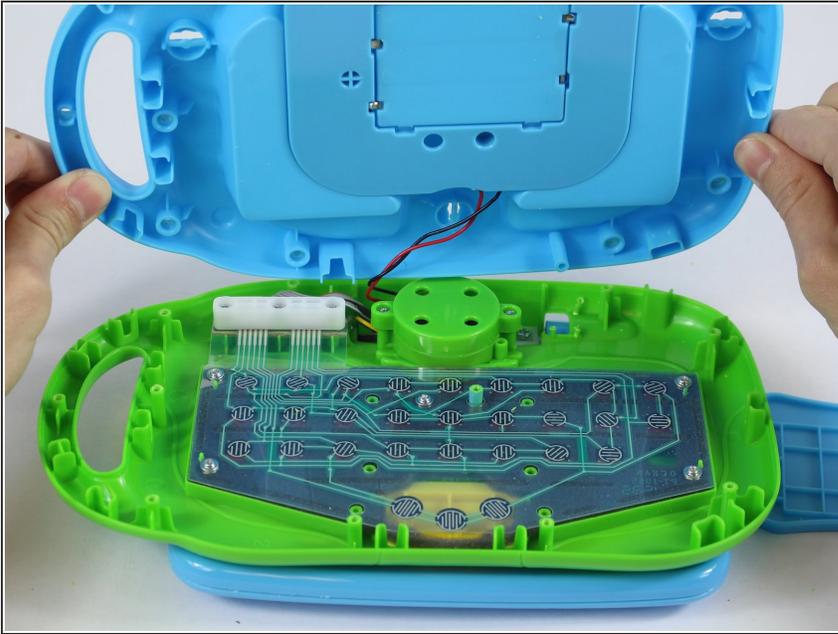

- Carefully pry the batteries out with a plastic opening tool prying from the non spring side.
- Remove the three AA batteries.
- ⓘ Note the direction of the batteries for when reassembling.

Step 4 — Speaker

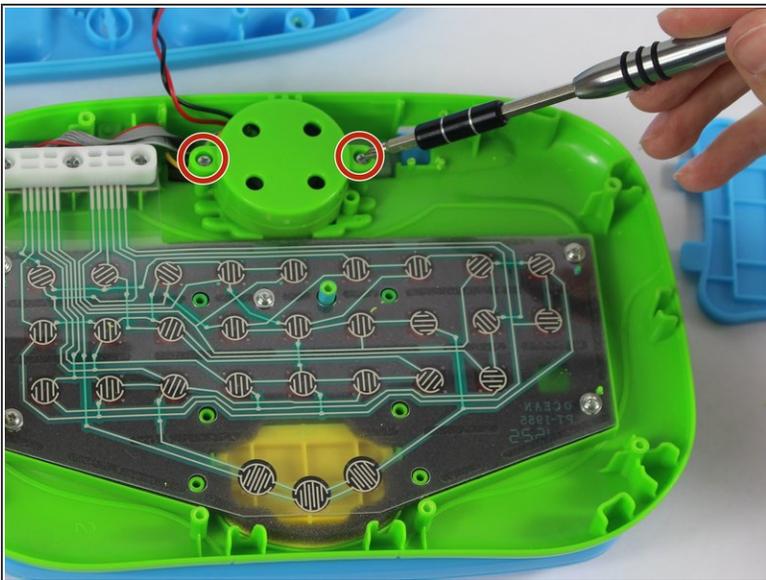

- Remove the eleven 10mm screws from the back of the device with a PH1 Phillips head screwdriver.

Step 5

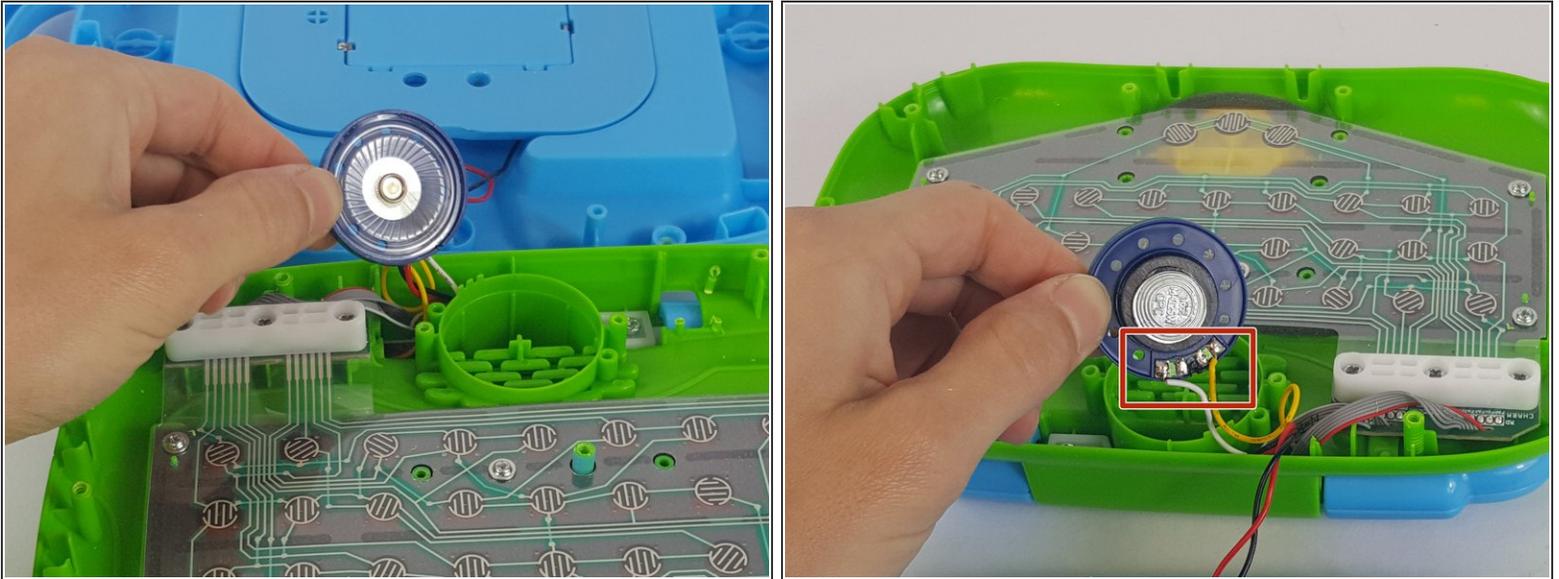

- Carefully remove back of the device.
- ⚠ Make sure not to rip the wires when lifting the cover off.

Step 6

- Unscrew the two 7.5 mm screws to the left and right of the speaker with a PH1 phillips head screwdriver.
- Remove the cover and place to the side.

Step 7

- Once the cover is removed, gently lift up the speaker making sure not to rip or break the wires.
- ☞ If you are disassembling the device to clean the speaker, clean it at this point with a soft, lightly dampened cloth.
- Gently turn the speaker over and carefully desolder the white and yellow wires from the speaker.

To reassemble your device, follow these instructions in reverse order.
