

Black and Decker LI2000 Orange Casing Replacement

Replace the orange casing of your LI2000

Written By: Katherine Simmons

INTRODUCTION

The orange casing must be removed before accessing the rest of the parts.

TOOLS:

- [Phillips #000 Screwdriver](#) (1)
 - [iFixit Opening Tools](#) (1)
 - [Phillips #1 Screwdriver](#) (1)
-

Step 1 — Orange Casing

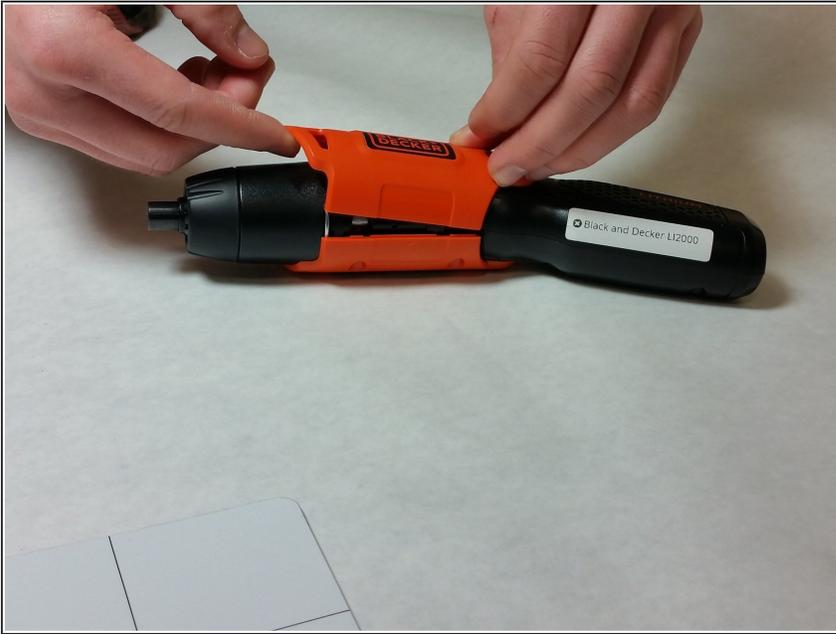

- Remove the following five screws
 - Three 20 mm Phillips #1 screws
 - One 10 mm #000 Phillips screw
 - One 13 mm Phillips 31 screw
- ⚠ When you remove the 13 mm screw, the spring may pop out of the screwdriver. Point the backside of the screwdriver away from your face and others.

Step 2

- Remove the black sticker with recycling information.

Step 3

- Use your fingers or a plastic opening tool to pry the casing apart.

Step 4

- Remove the plastic slider by picking it up off the screwdriver.
- ⓘ You may consider leaving half of the casing on the screwdriver to make handling the screwdriver easier.

To reassemble your device, follow these instructions in reverse order.
