INTRODUCTION

Some things to consider before you work on the Sony Cyber-shot DSC W800 to replace the Button Board:

- The Button Board is an integral part of the device and any improper handling can cause issues in other parts of the camera.
- Be cautious when removing ribbon wires.
- Be sure to keep track of all pieces that are taken apart.

TOOLS:

Spudger (1)

Tweezers (1)

Phillips #000 Screwdriver (1)

Step 1 — Button Board

- Remove the five 4.0 mm Phillips #000 screws on the back panel.

Step 2

- Using the Spudger, remove the back panel from the device.
- The loose piece circled in the picture will most likely fall off the camera housing.

Step 3

- Remove the two 2.15mm Phillips #000 screws from the circuit board.
- Gently pull on the ribbon wire from ZIF connector with the [tweezers](#) to remove the button board.

⚠ Ribbon wires can easily be damaged.

To reassemble your device, follow these instructions in reverse order.
