

# HTC Desire 816 Battery Replacement

Replace your dead battery to have power for your phone.

Written By: Saleena Douangphachanh

# INTRODUCTION

This Guide's purpose is to help the user get to the power supply of the device for replacement.

## TOOLS:

- [iFixit Opening Tools](#) (1)
  - [Spudger](#) (1)
-

## Step 1 — Battery

- Pry open the back panel by inserting the plastic opening tool on the left of the camera. We find this spot the easiest to get the tool under the panel.

## Step 2

- Once you get an open spot, with a second plastic opening tool, slide down to the bottom of the phone to free the rest of side.

## Step 3

- There is adhesive between the battery and the back panel. Take a nylon spudger to cut through the adhesive.

 Be sure to use the correct tool for the job. Metal spudgers can puncture an unprotected battery, potentially causing a fire.

## Step 4

- Once all way around the bottom, the panel should be broken free of the adhesive, and the rest of the panel should pop right off.

## Step 5

- Insert a nylon spudger at the bottom of the battery and lift up to remove the battery.

⚠ Be sure to use the correct tool for the job. Metal spudgers can puncture an unprotected battery, potentially causing a fire.

## Step 6

- There is adhesive on the other side of the battery as well, take the nylon spudger used to get off the panel and cut through.

## Step 7

- Carefully lift battery backside first to disconnect the white connector.

To reassemble your device, follow these instructions in reverse order.
