Lenovo Flex 3-1120 Battery Replacement

This guide is intended to help you to replace...

Written By: Geoff Bentz

INTRODUCTION

This guide is intended to help you to replace your battery. The battery may need to be replaced in instances where your computer will not hold a charge or turn on.

🔧 TOOLS:

Phillips #0 Screwdriver (1)
iFixit Opening Tool (1)

⚙ PARTS:

5B10K10179 - Lenovo Laptop Battery - Genuine (1)

Step 1 — Bottom Panel

- Lay the computer down with the bottom panel facing up.

Step 2

- Locate the ten 6mm Phillips screws along the edges and in the center of the back panel.

- Remove all ten 6mm Phillips screws with a size 0 Phillips screwdriver.
Step 3

- Wedge the plastic opening tool into the small space under the back panel.

- Use the plastic opening tool as a lever to separate the bottom panel from the computer.

- Slide the tool along the edges of the computer until the bottom panel is completely separated.

- ⓘ You may start prying the bottom panel on any edge.

Step 4

- Lift the bottom panel off of the computer.

Step 5 — Battery

- Locate the black battery on the bottom right of the computer.

Step 6

- Locate the six 3.5mm Phillips head screws along the edges of the battery.

- Remove all six of the screws using a size 0 Phillips screwdriver.

Step 7

- Locate the multicolored power cables coming directly from the top of the battery and into the motherboard.

- Use a spudger to slide the power cables down and away from its port on the motherboard.

Step 8

- Lift the battery out from the computer.

To reassemble your device, follow these instructions in reverse order.
