

Leapfrog My Own Leaptop Battery Replacement Guide

Replacement of malfunctioning or dead batteries.

Written By: Jonathan Fitzer

INTRODUCTION

This guide is designed to instruct users on how properly replace dead or low batteries in the device. Tools will be necessary as well as new AA batteries.

TOOLS:

- [Phillips #1 Screwdriver](#) (1)
 - [Plastic Opening Tool](#) (1)
-

Step 1 — Battery

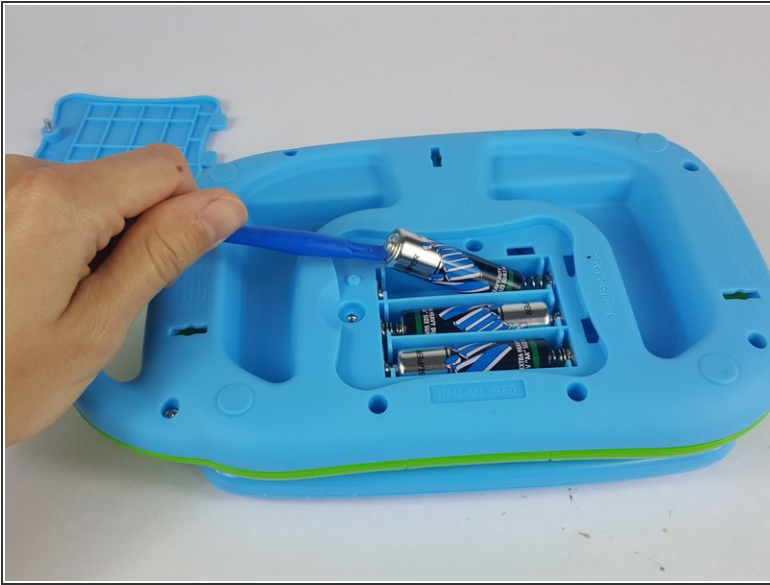

- Flip over device so that back portion of the device is facing you.

Step 2

- Unscrew the one 10mm screw that holds the battery cover in place with a a PH1 phillips head screwdriver.
- ★ Please note that the screw cannot be removed as it is attached to the battery cover.

Step 3

- Carefully pry the batteries out with a plastic opening tool prying from the non spring side.
- Remove the three AA batteries.
- ⓘ Note the direction of the batteries for when reassembling.
