---

## INTRODUCTION

This guide shows how to remove the side panel from the camera, how to remove the back panel, and how to replace the zoom button.

---

### TOOLS:

- [Phillips #1 Screwdriver](#) (1)
-

## Step 1 — Side Panel

- Slide the battery eject button open to release the battery door.

## Step 2

- With the battery door open, carefully remove all four 5 mm Phillips #1 screws.

### Step 3

- Rotate the camera so that the underside is facing up.
- Remove the four 5 mm Phillips #1 screws.

### Step 4

- Place the camera on a flat surface, with its underside facing you.
- Gently pull up on the side panel to remove it from the camera.

## Step 5 — Zoom Button

- Remove the 4 mm Phillips #1 screws holding the weight.
- Remove the weight.

## Step 6

- Remove the two 4 mm Phillips #1 screws holding the back panel in place.

## Step 7

- Apply pressure to the back panel, pulling away from the camera to remove it.

## Step 8

- Remove the final 4 mm Phillips #1 screw holding the screen in place.

**i** This screw is very small and hard to see.

## Step 9

- Carefully apply pressure away from the camera to the screen to detach it from the body.
- The white cord should still be connected to the body.
- ⓘ OPTIONAL: [Remove the screen](#) to make accessing the zoom button easier.

## Step 10

- Remove the three 4 mm Phillips #1 screws holding the top panel in place.

## Step 11

- Push upward on the top panel to remove it from the body of the camera.

## Step 12

- Remove the two 4 mm Phillips #1 screws holding the circuit board in place.

**⚠ Do not remove the silver screws.**

## Step 13

- Lift the circuit board out of the plastic casing.
- Gently pull on the zoom button to remove it from the circuit board.

To reassemble your device, follow these instructions in reverse order.
