

Keurig B60 Water Gasket Replacement

These steps will walk you through how to replace the water gasket on the Keurig B60.

Written By: Jake Wynn

INTRODUCTION

Replacing the Water Filter requires only a couple steps as outlined below.

TOOLS:

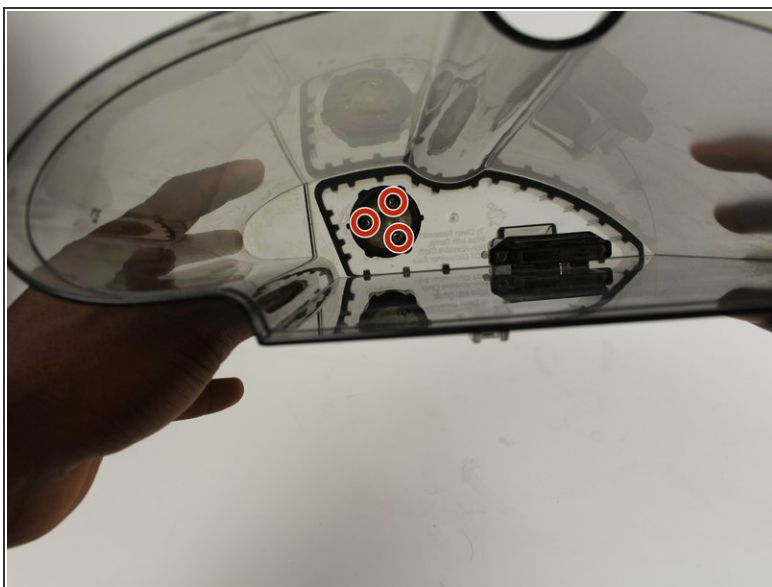

- [Phillips #1 Screwdriver](#) (1)
 - [iFixit Opening Tools](#) (1)
-

Step 1 — Water Filter

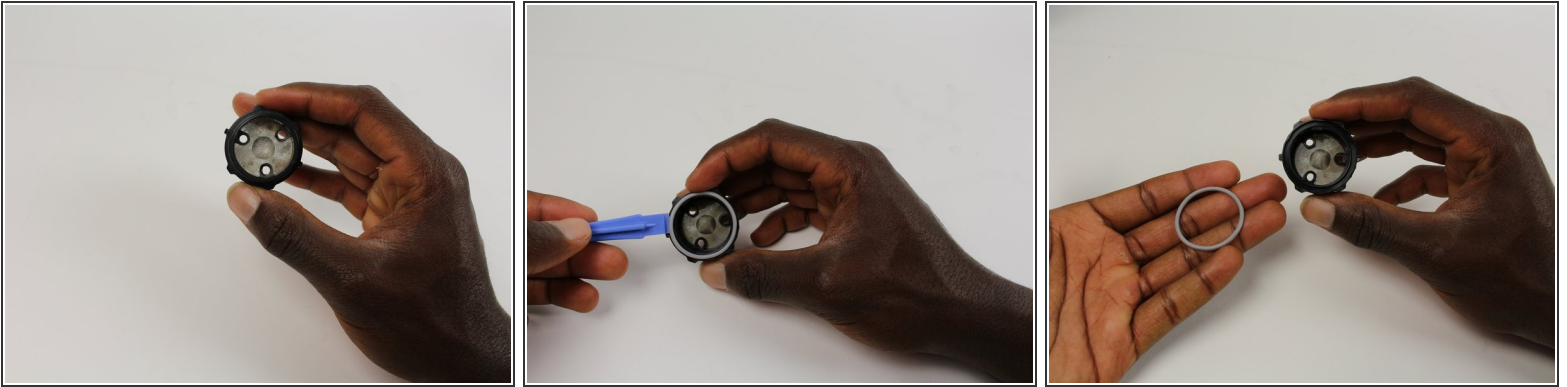

- Remove the Water Reservoir Cap and the Water Reservoir from the brewer by simply pulling up and out

Step 2

- Remove the three 9.5 mm Phillips #1 screws that secure the small circular screen to the bottom of the water reservoir.

Step 3

- This circular screen has a rubber "O"-ring around the base. Use the plastic opening tool to pry off the rubber seal. Replace with undamaged seal.

To reassemble your device, follow these instructions in reverse order.
