INTRODUCTION

Learn how to remove the clogged old screen, deep clean grouphead and install new screen and gasket.

TOOLS:

- [Craftsman 5/16" x 1 3/4" slotted screwdriver](#) (1)
- [Wire Brush](#) (1)
- [Canned Air](#) (1)
- [Awl](#) (1)
- [Hook & Pick Set](#) (1)

PARTS:

- [Coffee Detergent \(We like Joe Glo\)](#) (1)
- [Rancilio Silvia Grouphead Gasket and Screen](#) (1)

Step 1 — Identify Version & Prepare Machine For Tune-Up

- Identification instructions.

Step 2 — Remove Water Tank

- Remove water tank, hoses, and tuck them back in the machine.

Step 3 — Flip Machine

- Remove drip tray. Flip the machine upside down.

Step 4 — Remove The Screen & Diffuser

- Remove screen screw with flat head screwdriver.

Step 5 — Remove the old screen.

- Remove old screen and diffuser.

Step 6 — Remove and soak diffuser.

- Remove and soak diffuser in Joe Glo coffee cleaner.
- ⓘ On version 3 you will need to remove and soak the brass disc as well.

Step 7 — Remove Old Grouphead Gasket

- Pry the gasket up with the sharp tip of the awl.

Step 8 — Don't Stab Yourself!

- Carefully remove old gasket.

Step 9 — Soak grouphead.

- Use Joe Glo coffee cleaner and hot water to soak the grouphead for 10-15 minutes.

Step 10 — Cleaning Grouphead

- A dental pick works great for cleaning the grouphead.

Step 11 — Clean with flathead screwdriver.

- Use a small flathead to clean the bottom surface of the grouphead.

Step 12 — Clean with wire brush.

- A small stainless steel brush works well. They can be found at your local hardware store.

Step 13 — Remove water with towel.

- Use a paper towel / regular towel to soak the dirty water from the grouphead.

Step 14 — Blow out rest of water.

- Use the compressed air can to clean any excess water or coffee.

Step 15 — Final scraping.

- Last but not least, use the pick on the top and bottom rails to remove last bits of coffee debris.

Step 16 — Install New Gasket & Screen

- Remove parts from bag.

Step 17 — Insert gasket with lettering down.

- Take the new gasket and install it with the lettering down.
- Use a 1/4 inch flat punch to push down the gasket to ensure its nice and flat.

Step 18 — Install diffuser and screw.

- Insert the diffuser with the water channels facing down.

Step 19 — Install 8mm screw.

- Use an 8mm socket wrench to tighten the screw.

Step 20 — Tighten screw.

- Careful not to over tighten and break screw. It will be extremely difficult to remove.

To reassemble your device, follow these instructions in reverse order.
