the HTML code into your website and the guide will display as a small widget.

But hey, let's demonstrate how to embed a guide with an embeddable guide! Because we're just that meta.

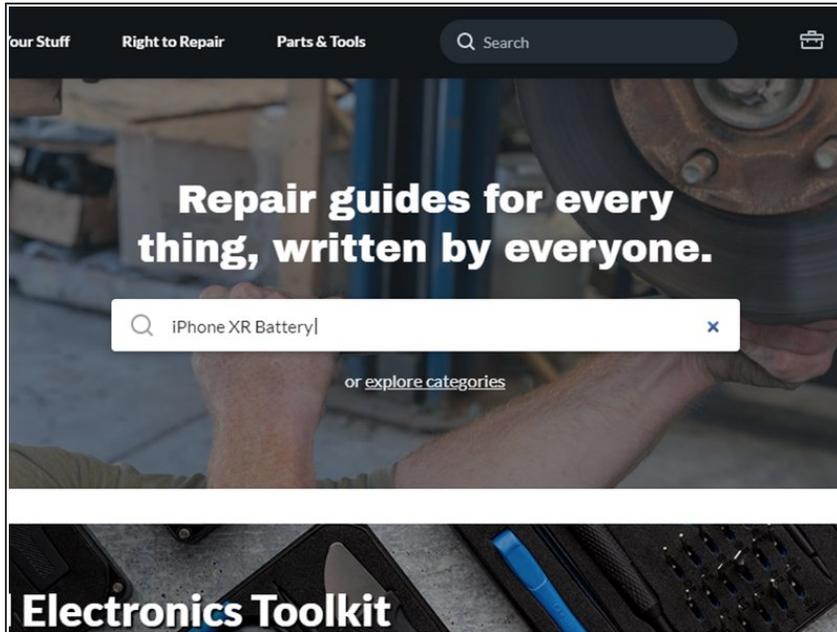

Samsung Galaxy Note7 Teardown
Author: Scott Havard

INTRODUCTION

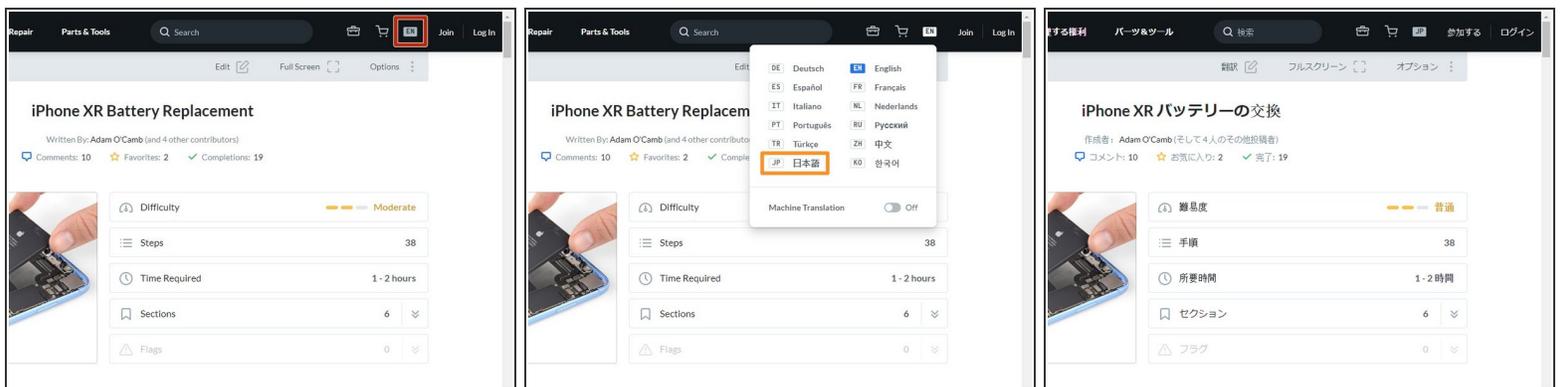

In this guide, you will learn how to grab and embed an HTML code that allows you to publish an iFixit guide or teardown onto another site.

Step 1 — View teardown or guide

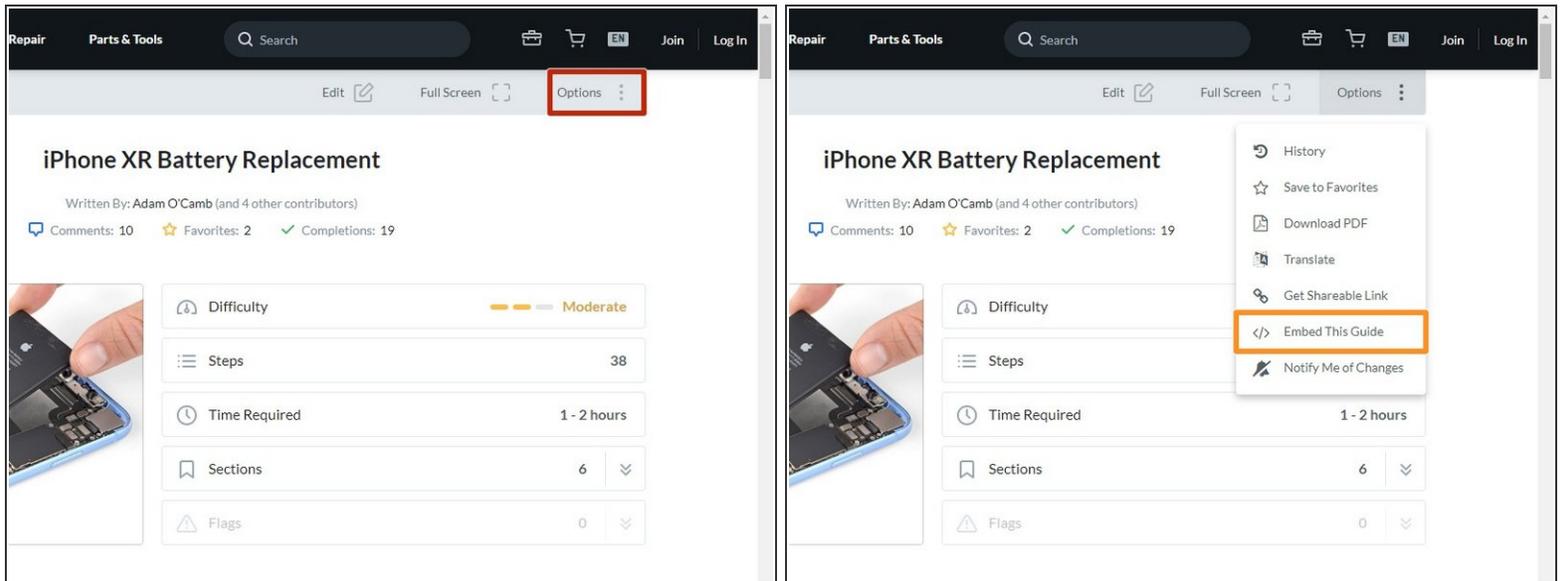

- Navigate to the teardown or guide page that you would like to embed.

Step 2 — Select language (optional)

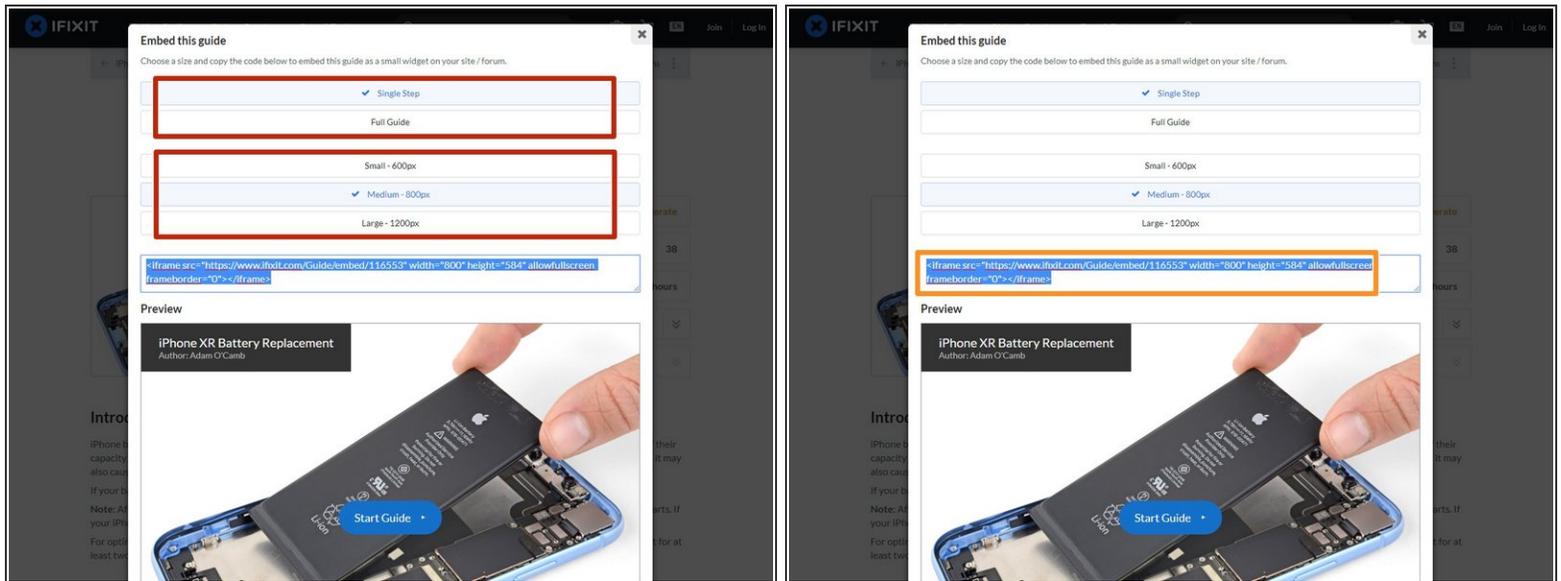

- If you wish to embed the guide or teardown in a different language than the one currently selected:
 - Click on the language icon in the upper right of the header bar.
 - In the pop-up window, click to select the desired language.
 -  The site will load the page in the selected language.

Step 3 — Create embed code

- Click the "Options" button on the upper-righthand corner of the page.
- Select "Embed This Guide" from the dropdown menu.

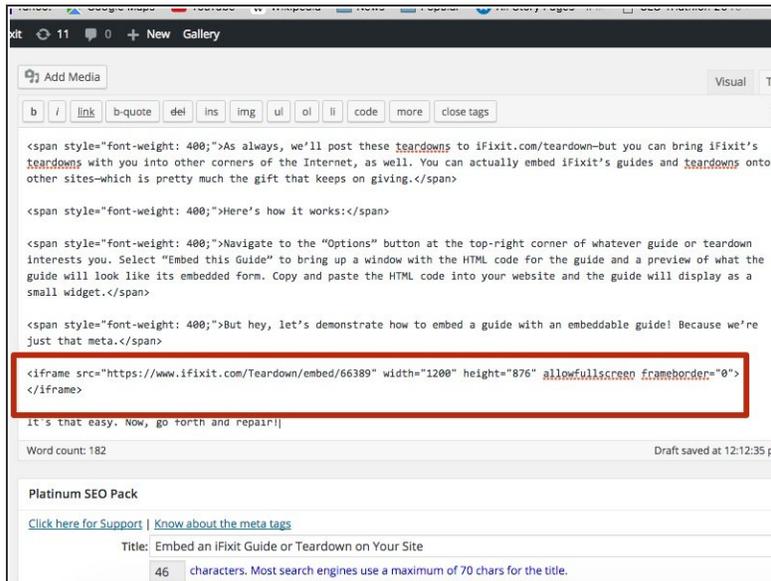

Step 4 — Copy embed code

i A pop-up window will appear with an HTML embed code and a preview of your embedded guide.

- Select the size you wish the embedded guide to be.
- Copy the auto-generated HTML code.

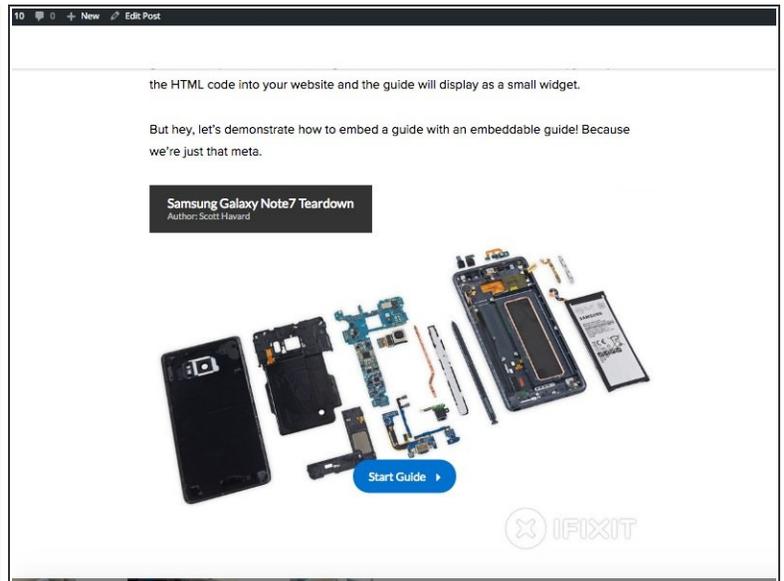

Step 5 — Embed guide on your site

The screenshot shows a text editor interface with a toolbar at the top containing options like 'Add Media', 'Visual', and 'Text'. Below the toolbar is a rich text editor with various formatting options (bold, italic, link, quote, del, ins, img, ul, ol, li, code, more, close tags). The main text area contains several paragraphs of instructional text, with the following HTML code highlighted in a red box:

```
<iframe src="https://www.ifixit.com/Teardown/embed/66389" width="1200" height="876" allowfullscreen frameborder="0">
</iframe>
```

Below the text area, there is a 'Word count: 182' indicator and a 'Draft saved at 12:12:35 p' timestamp. At the bottom, there is a 'Platinum SEO Pack' section with a 'Title' field containing 'Embed an iFixit Guide or Teardown on Your Site' and a character count of '46 characters. Most search engines use a maximum of 70 chars for the title.'

The screenshot shows a website page with the following content:

- A paragraph: "the HTML code into your website and the guide will display as a small widget."
- A paragraph: "But hey, let's demonstrate how to embed a guide with an embeddable guide! Because we're just that meta."
- A card titled "Samsung Galaxy Note7 Teardown" by "Author: Scott Havard".
- An image of a disassembled Samsung Galaxy Note7 with various components laid out. A blue button labeled "Start Guide" is overlaid on the image.
- The iFixit logo in the bottom right corner.

- Paste your HTML code into the site's text box.
- Enjoy your embedded guide!
