

Back Panel

Remove the back panel of the device.

Written By: Steven Gontarz

INTRODUCTION

Removing the back panel of the device allows you to access the inside components that might need to be replaced.

TOOLS:

- [iFixit Opening Tools](#) (1)
-

Step 1 — Back Panel

- Power off the device
- Remove any cables that might be connected to your device
- Make sure the device is placed on a flat surface with the display screen facing up

Step 2

- Wedge the plastic opening tool in between the display screen and back panel
- ⚠ Do not apply too much pressure in order to avoid cracking the screen

Step 3

- Carefully separate the display from the back panel

To reassemble your device, follow these instructions in reverse order.
