Lenovo B575-1450 CD-ROM Drive Replacement

This guide will go through the steps necessary to removing the CD-ROM drive from the Lenovo B575-1450

Written By: Carlo Calvillo

INTRODUCTION

The CD-ROM drive is fairly easy to locate and replace if it is no longer working.

🔧 TOOLS:

- Phillips #00 Screwdriver (1)
- iFixit Opening Tools (1)

Step 1 — Battery

- Turn off the computer.

- Disconnect the charger from the computer.

- Flip the computer upside down.

Step 2

- Push the right-hand switch outward into the "unlocked" position.

Step 3

- While holding the battery, use your other hand to push the left clip to the left and pull the battery out.
Step 4 — Back Panel

- (i) The screws are captive to the back panel so they are not to be removed.

- Using the Phillips #00 Screwdriver, Loosen the five 5.4 mm screws around the back panel from the laptop.

Step 5

- Using a plastic opening tool, pry the back panel from the laptop.

Step 6

- Pull the panel outward from the rest of the laptop. The inside of the laptop will be exposed. From here you can access the CD-ROM drive, hard drive, and Keyboard.

Step 7 — CD-ROM Drive

- Using the Phillips #00 Screwdriver, remove the 3.4 mm screw from the CD-ROM bracket.

- ⓘ This unlocks the CD-ROM drive from the computer

Step 8

- Pry CD-ROM drive from laptop using a plastic opening tool.

- Pull the CD-ROM drive the rest of the way out.

To reassemble your device, follow these instructions in reverse order.
