Written By: Afif Chehabaldeen

INTRODUCTION

Follow this guide to replace/upgrade your RAM on your Samsung NP-N210-JA02US. Make sure that your replacement RAM is suitable for this device.

TOOLS:

- [Phillips #1 Screwdriver](#) (1)
-

Step 1 — RAM Removal

- Remove the one 3.5 mm Philips #00 screw.

Step 2

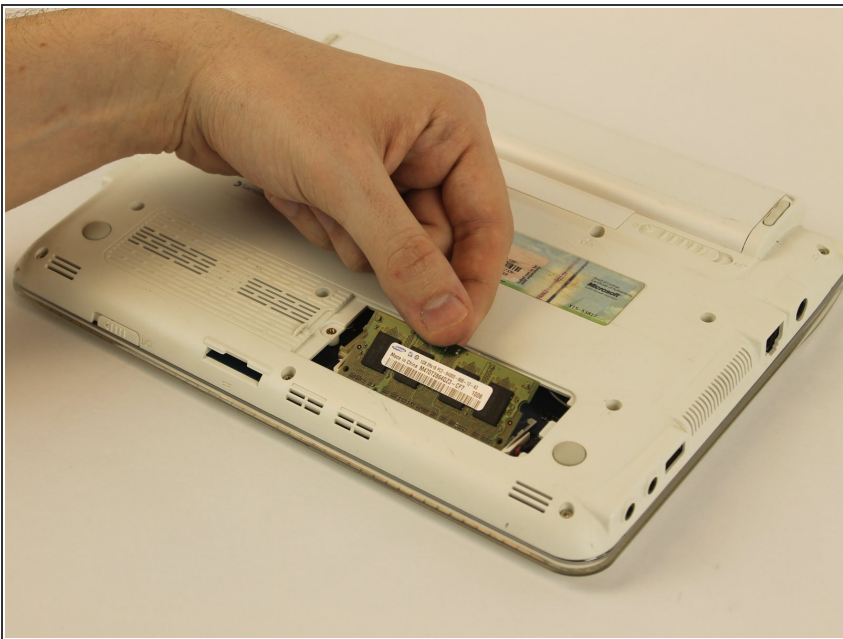

- Use your finger to pry the RAM cover away from the body of the NP-N210 near the vent.

Step 3

- Pull the two retaining arms away from the RAM.

Step 4

- Pull the RAM out of its socket.

To reassemble your device, follow these instructions in reverse order.
