There are many repair guides of HTC 10 online and some of them show the wrong ways to remove HTC 10.

You can't open the screen with a card or a knife. This video shows you 6 wrong ways of opening the LCD and one right way to open the screen.

TOOLS:

- [Heat Gun](#) (1)
 - [iFixit Opening Tools](#) (1)
 - [Plastic Cards](#) (1)
 - [iFixit Opening Picks set of 6](#) (1)
 - [Suction Handle](#) (1)
-

1. It is not possible to open HTC 10 lcd with spudger, knife, card;
2. We opened it under the help of suction cup;
3. The screen edges of HTC 10 cools down very quickly because of the metal back housing, so we should heat up the edges for several time and each time heat up for a quite long time.
