# Flip Video Ultra Power button Replacement

If the power button is stuck or otherwise not working the guide will walk you through it.

Written By: Nathaniel Ruf

INTRODUCTION

This guide will walk you through on how to remove the power button and replace it. You will need the iFixit Opening Tool and the Phillips #1 Screwdriver. It should take no more than 15 minutes, if it takes more than that then you may have done something wrong.

TOOLS:

- Phillips #1 Screwdriver (1)
- iFixit Opening Tools (1)

Step 1 — Power button

- Unlock the battery cover by sliding the switch to the unlock position.

Step 2

- Remove the battery cover by sliding it down the camera.

Step 3

- Remove the batteries

Step 4

- Slide the black upper casing off from the device.

Step 5

● Remove the six 1mm screws from the back and upper casing with the Phillips Head screwdriver.

Step 6

● Remove the top casing from the bottom to reveal the inner circuit board.

Step 7

ⓘ When removing the back panel, the rubber buttons will become loose and likely fall off the board. This is normal and can easily placed back on the board once finished.
● Remove the six 1mm screws with the 1 Phillips head screwdriver.

Step 8

● Gently separate the circuit board from the casing.

Step 9

- Unscrew the single 1mm screw from USB housing unit.

Step 10

- Unscrew the 2 1mm screws and gently separate camera wires from plastic casing.
