Step 1 — Battery

- Use a plastic opening tool to undo the clips that attach the two halves of the tablet.

- ⓘ Be gentle with the pry tool and work your way around the edges of the tablet slowly.

- ⚠ Make sure the tablet is powered off before prying open.

- ⚠ There are two power ribbons connecting the screen to the back of the tablet. Make sure not to put too much stress on them.

Step 2

- Lift off the tape that holds the speaker wires to the battery

- 📌 Leave the tape off to the side

Step 3

- Use a soldering tool to disconnect the two wires (red and black) that connect the battery to the motherboard

- 📌 Note the placement of each colored wire in the motherboard

- ⓘ If you have no experience in soldering, please follow this guide

Step 4

- Use a credit card to lift the battery off the back of the tablet

⚠️ Do not put any pressure on the motherboard or any other internal components.

ⓘ The battery attached to the back panel with adhesive. You may need to use a heated iOpener to loosen the adhesive and remove the battery.

To reassemble your device, follow these instructions in reverse order.
