

# Mid F900 Microphone Replacement

Replace a dying or dead microphone within your device

Written By: Matthew Oliva

---

## INTRODUCTION

This is a guide to replace the microphone in the device. Make sure to follow all the steps correctly and handle with care.

---

### TOOLS:

- [JIS Driver Set](#) (1)
  - [iFixit Opening Tools](#) (1)
  - [Soldering Iron](#) (1)
-

## Step 1 — Back Cover

- Using a J00 Phillips-head screwdriver, remove the two screws located at the bottom of the device.
- ⓘ Screws are 5mm x 1mm in size.

## Step 2

- Use the plastic opening tool to pry off the white back-plate of the device.

## Step 3 — Motherboard

- Using a +00 Phillips head screwdriver, remove the screws securing the motherboard to the device housing.

ⓘ Screws are 4mm x 1mm in size.

## Step 4

- Desolder the two black and red wires connected to the motherboard.
- Unclip and remove the ribbon cables attached to the motherboard.
- ⓘ For soldering help, use the [How to Solder and Desolder Connections](#) guide.

## Step 5

- Carefully lift and remove the motherboard from the device housing.

This document was generated on 2020-11-23 10:00:32 AM (MST).

## Step 6 — Microphone

- Flip the motherboard over to bring the underside into view.
- Find and desolder the microphone near the bottom of the motherboard and remove it.
- Solder the new microphone in its place.
- ⓘ For soldering help, check out the [How to Solder and Desolder Connections](#) guide.

To reassemble your device, follow these instructions in reverse order.
