 **TOOLS:**

- [Spudger](#) (1)
 - [Phillips #0 Screwdriver](#) (1)
 - [Metal Spudger](#) (1)
-

Step 1 — Battery Replacement

- Remove the fourteen 3.75mm screws with a Phillips #0 Screwdriver as shown.

Step 2

- Gently pull out the battery.

Step 3 — Hard Drive

- Using a spudger, poke the white tabs in by the battery until you hear a click.

Step 4

- Using a spudger, poke the white tabs in by the battery until you hear a click.

⚠ Be sure to use ESD-safe tools, we recommend using the [iFixit Pro Tech Toolkit](#)

Step 5

- Unplug the Hard Drive from the Motherboard.

Step 6

- Unplug both ribbons by flipping back the white tabs on either end of the ribbons and gently pulling the ribbons out.

Step 7

- Using the 0 Phillips Head, unscrew the two 3.75mm screws connecting the USB Port Circuit Board to the hard drive.
- Remove the USB Port Circuit Board.

Step 8

- Gently remove the hard drive.

To reassemble your device, follow these instructions in reverse order.
