HP Slate 7 Plus 4200US Tablet Cover Replacement

Use this guide to replace the tablet cover on your HP Slate 7 Plus 4200US.

Written By: Jessica Andrade
TOOLS:

- iFixit Opening Tools (1)
Step 1 — Tablet Cover

- Turn off the tablet and disconnect the power and all external devices from the tablet.

- Position the tablet with the display panel down and the right side toward you.

- Carefully insert a plastic opening tool between the tablet cover and display panel assembly, separating the two components. The first insertion point should be between the power button and the volume buttons.

Step 2

- Slide the tool around the perimeter of the tablet until the edge of the cover is completely separated from the display panel assembly.

Step 3

- Pry open the back cover to take it off.

To reassemble your device, follow these instructions in reverse order.
