⚒ TOOLS:

- [Phillips #0 Screwdriver](#) (1)

www.iFixit.com

Step 1 — Outer Cover

- Power on the device, eject the disk tray, and power off the device.

- Turn the device over.

- Lightly apply downward pressure on the black covering on the disk tray until it comes off.

⚠ Caution, applying too much pressure can break the black covering.

Step 2

- Turn the device around.

- Using a Phillips screw driver, remove the screws on both ends of the device circled red in the image.

- Slide the side covers on either side towards the back of the device.

- (i) There is a back cover on either side of the device.

Step 3

ⓘ This step might require someone to help unclasping the plastic clips.

● Turn the device so that the bottom is facing up.

● In the bottom, unclip the three plastic clips circled in red.

● On either side, unclip the plastic clip circled in red

● Slide the black covering forwards to remove.

ⓘ All five clips have to be unclasped for the covering to be removed.

⚠ Careful not to break the plastic clips when putting it back on.

To reassemble your device, follow these instructions in reverse order.
