# HP Omni 10 Speaker Replacement

This guide will show how to remove and replace HP Omni 10 speakers.
Written By: Alex Miller

INTRODUCTION

Using a spudger and a 00 Phillips head screwdriver, this guide will show how to remove a pair of speakers from an HP Omni 10 tablet in roughly 5 to 7 minutes.
⚒ TOOLS:

- Spudger (1)
- Phillips #00 Screwdriver (1)
- Tweezers (1)
- iFixit Opening Tools (1)
- 64 Bit Driver Kit (1)

Step 1 — Battery

- Remove the back cover from the tablet.

- (i) The cover is securely fastened to the device and may be difficult to remove.

Step 2

- Push the black plastic security flaps into an upward position.

- Lift the small tab on the security strips up and peel them across the battery. They will be attached via adhesive.

- Lift the tab on the strip up and pull it across the battery.

- (i) The orange strip does not fully detach from the tablet like the other three. It will only detach from one side.
Step 3

- Unscrew the ten 3.3 mm screws securing the battery using a 00 Phillip's head screwdriver.

Step 4

- Unhook the cord from the edge of the battery.

- Pull the wire circuit out and down.

Step 5

- Lift the battery up by its edges and remove it carefully. There will be adhesive holding the battery down.
Step 6 — Micro Card Reader

- Unscrew the two 3.3 mm screws using a 00 Phillip's head screwdriver.
Step 7

- Lift and remove micro card reader board.

Step 8 — Speaker

- Unscrew the four 3.3 mm screws using a 00 Phillip's head screwdriver.

Step 9

- Pull the black and white wire connector up to disconnect it.

Step 10

- Pull the red and black wire connector up to disconnect it.

Step 11

- Lift the speaker set out of their sockets.
- (i) The speakers will also be attached via adhesive. They may be difficult to remove by hand.

Step 12

- Unhook the left speaker's connector wire to fully remove it from the device.

To reassemble your device, follow these instructions in reverse order.
