# Uniden UTAB71 Camera Replacement

Written By: Ryan Jewell

INTRODUCTION

This guide will explain how to replace the camera in this tablet. If there is any confusion about removing the battery, see the battery replacement guide.

## 🔧 TOOLS:

- iFixit Opening Tools (1)
- Plastic Cards (1)
- Solder (1)
- Soldering Iron (1)
- iOpener (1)

This document was generated on 2020-11-28 05:31:04 AM (MST).
Step 1 — Camera

- Use a plastic pry tool to separate the two halves of the tablet.

- ⓘ Make sure to be gentle with the pry tool and work your way around the edges of the tablet slowly.

- ⚠ Make sure the tablet is powered off before prying open.

- ⚠ There are two power ribbons connecting the screen to the back of the tablet. Make sure not to put too much stress on them.
Step 2

- Use a credit card to lift the battery off the back of the tablet.

⚠ Do not put any pressure on the motherboard or any other internal components.

ⓘ The battery is glued onto the back of the tablet so make sure to apply as much pressure as needed

Step 3

- Undo the clips off the power ribbon connecting the camera to the motherboard using the blue pry tool.

Step 4

- Use the pry tool to remove the yellow tape from the power ribbon connected to the camera.

- Place the plastic pry tool under the camera component and lift it off the tablet.

To reassemble your device, follow these instructions in reverse order.
