

Astro A40 TR External Headband Replacement

The following is a guide to disassemble or replace the external headband component on your ASTRO A40 TR Headset.

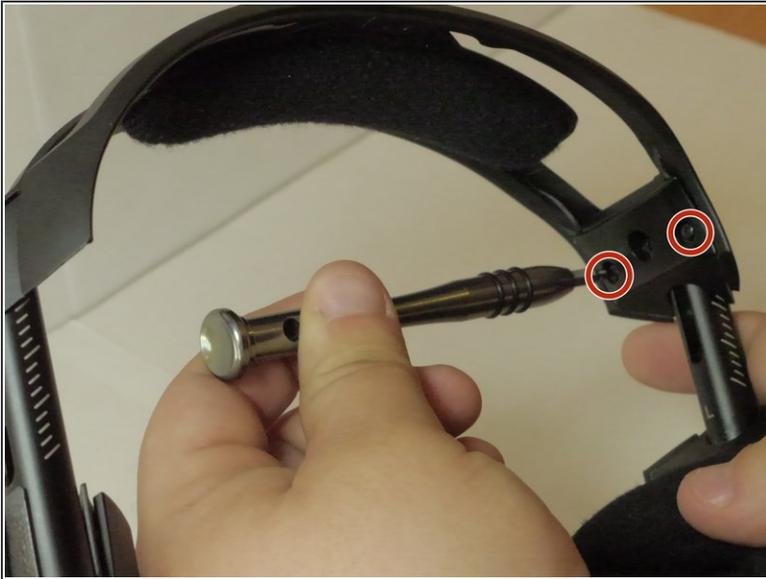

Written By: Mike

 **TOOLS:**

- [Phillips #00 Screwdriver \(1\)](#)
-

Step 1 — External Headband

- Remove two hex screws on each side to free and remove the base plate. Do each step for both sides.

Step 2

- Pull apart earpiece assembly and the connecting headband piece.

Step 3

- Gently pull the padding layer off of both ends using your hands.

Step 4

- Locate the black wiring and gently pull it out of the plastic headpiece component.

To reassemble your device, follow these instructions in reverse order.
