INTRODUCTION

We will be opening the center panel and removing the two RAM cards.

🔧 TOOLS:

- iFixit Opening Tools (1)
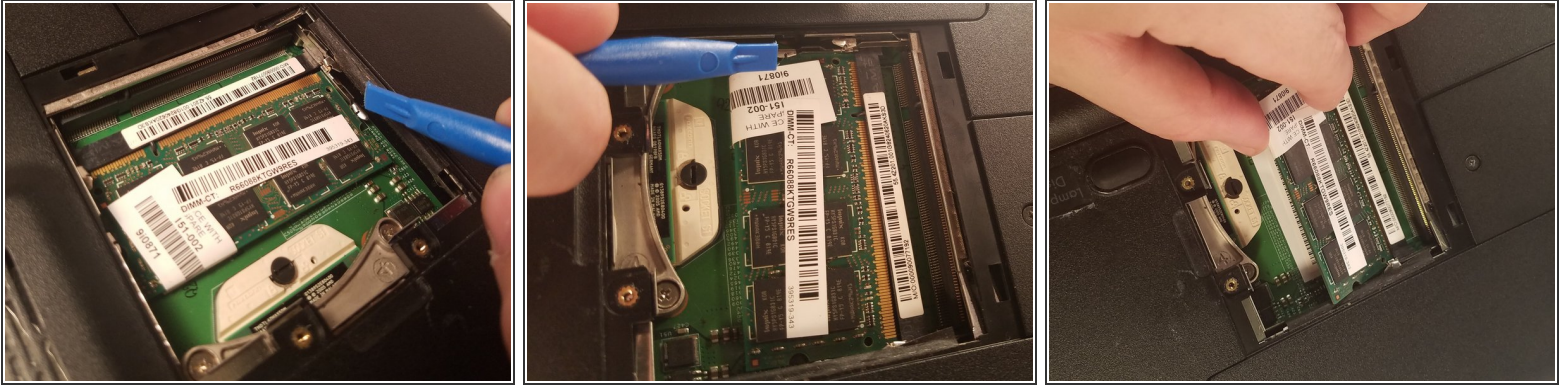

Step 1 — Ram

- Unscrew the two screws on the center panel of the device .

- Then gently remove the center panel.

Step 2

- Gently push the silver clamps on both sides of the RAM stick on top.

⚠ Pushing the clamps back could damage the device. push far enough to remove the RAM card.

- Now remove the RAM stick on top from the device.

Step 3

- Gently push the silver clamps on both sides of the bottom RAM stick.

⚠️ Pushing the clamps back could damage the device. Push gently just far enough to remove the RAM stick.

- Now remove the bottom RAM stick from the device.

Step 4

ⓘ this is the device with both RAM sticks removed.

To reassemble your device, follow these instructions in reverse order.
