Chromo Noria Camera Replacement

This guide will help you remove both the front facing and back facing cameras.

Written By: Ryan Rho

INTRODUCTION

This guide will walk you through the necessary steps to replace either camera on the Chromo Noria. Make sure you've got all the necessary tools and a bit of time before beginning!
🔧 TOOLS:

- iFixit Opening Tools (1)
- Tweezers (1)

Step 1 — Back Panel

- Insert your Plastic Opening Tool into the crease between the front panel and back panel.

- Slide the Opening Tool around the entire device. As you progress, you should see the device open.
Step 2

- Carefully turn the device over.

- Lay the back panel aside so you can see the device's parts.
Step 3 — Camera

- Carefully detach one side of the black tape from the board.

Step 4

- Using a small plastic opening tool, flip the black connector up until it makes "tick" sound.
- Now, the flexing cable is ready to be removed.

Step 5

- Using a pair of tweezers, hold the flexing cable right below the black connector.

- Gently pull the flexing cable out of the connector while balancing the other side of the device with another hand.

To reassemble your device, follow these instructions in reverse order.
