INTRODUCTION

Shows how to remove and replace the notebook battery

## Step 1 — Locate the keys to unlock and release the battery

- Put the notebook upside down, preferably on top of a soft surface so any movement doesn't scratch the top cover.

- Locate the keys to unlock and release the battery

Step 2 — Unlock the battery

- Slide the unlock key in the indicated direction to unlock the battery

This document was generated on 2020-11-28 05:59:54 AM (MST).

Step 3 — Release and remove the battery

- Slide and hold the release key in the indicated direction

- Pull out the battery

To reassemble your device, follow these instructions in reverse order.
