Polaroid PMID701i 10 Panel Replacement

Prerequisite Only

Written By: Amy Li

INTRODUCTION

Prerequisite Only

⚙ TOOLS:

- iFixit Opening Tools (1)
- Phillips #000 Screwdriver (1)

This document was generated on 2020-11-28 05:34:01 AM (MST).

Step 1 — Panel

⚠️ Turn off and unplug the device before starting replacement.

- Flip the device so that the screen faces down, with the back facing up.

ⓘ The back panel attaches to the device with four 4.0mm long screws, one at each corner, indicated by the red circles in the picture.
- Unscrew the four screws with a PH000 screwdriver.

Step 2

- Flip the device over so that the screen faces up, and the back faces down.

- Separate the front panel using the Opening Tool on a corner to create an opening.

- (i) Removing the frame for the first time may take a significant amount of force.

- Run the tool along the seams of the device to open up all the sides.

This document was generated on 2020-11-28 05:34:01 AM (MST).

Step 3

⚠ Removing the panel too quickly may damage the cable that attaches parts between the two panels.
● Gently lift the top panel from the bottom panel.

Step 4

ⓘ The flexible flat cables (FFC) attach to parts in the bottom panel with zero insertion force (ZIF) connectors.

● Use the Opening tool to flip up the black retaining flap on the smaller connector.

● Gently lift the cable, parallel to the panel, to detach it.

This document was generated on 2020-11-28 05:34:01 AM (MST).

Step 5

- Use the Opening tool to flip up the black retaining flap on the larger connector.

- Gently lift the cable, parallel to the panel, to detach it.

To reassemble your device, follow these instructions in reverse order.
