INTRODUCTION

Use this guide to replace the keypad on your phone.

🔧 TOOLS:

- Phillips #00 Screwdriver (1)
- iFixit Opening Tools (1)

Step 1 — Battery

- On the back of the phone, remove battery cover.
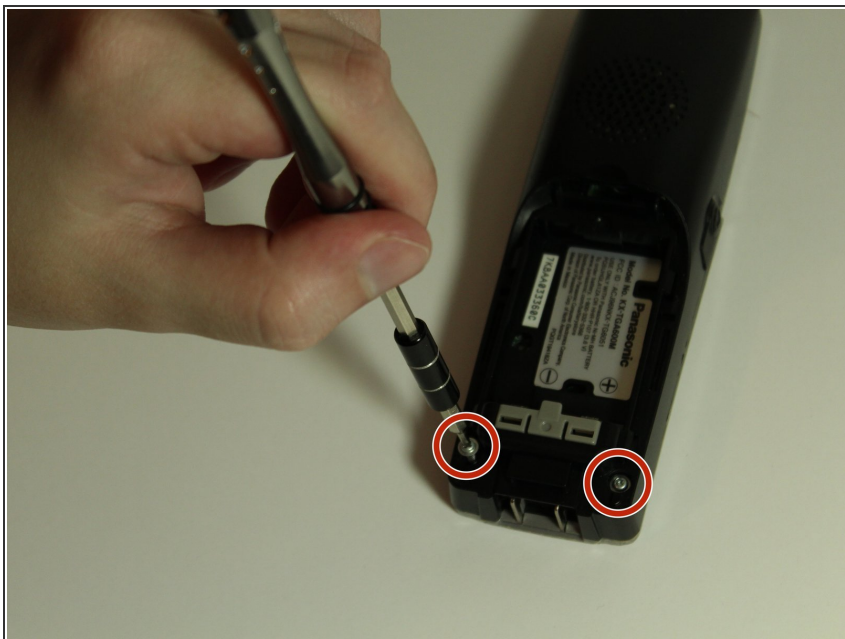

- Push down on the marked indentation and pull downwards.

Step 2

- Pull out to remove the battery.

Step 3 — Keypad

- Once battery is removed, use the Phillips #00 screwdriver to remove the two silver screws at the bottom left and right corners on the back of the phone.
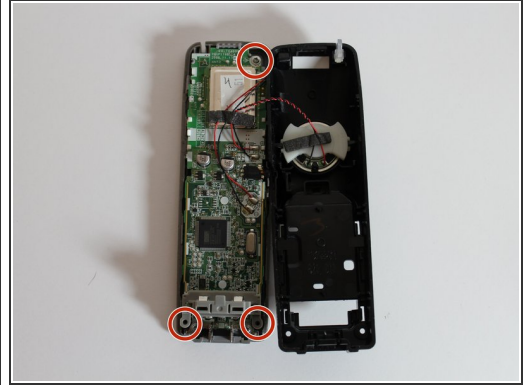

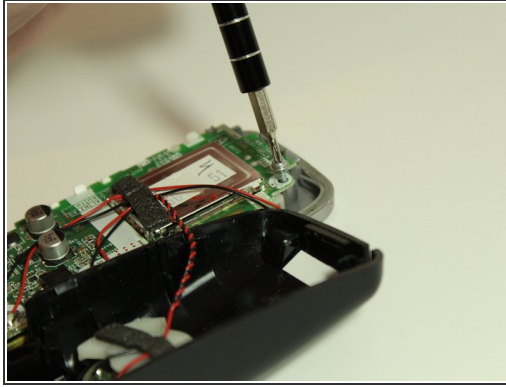

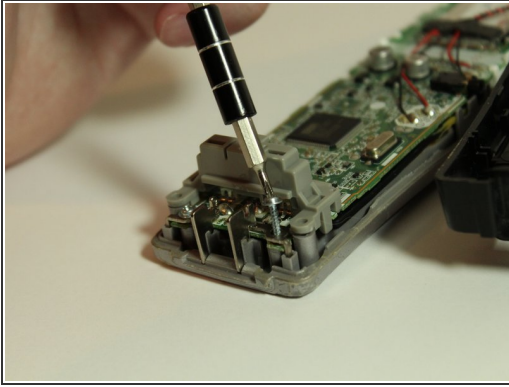

Step 4

- Pull the phone apart. The plastic opening tool may be needed.

- ⓘ The clear light piece will fall out, so make sure you place it next to the screws.

Step 5

- Use the Phillips #00 screwdriver to remove the three screws holding the circuit-board in place.

- (i) The screws are located in the top right corner, bottom left corner, and bottom right corner.

Step 6

- Once the screws are out, remove the charging contacts beneath the two bottom corner screws.
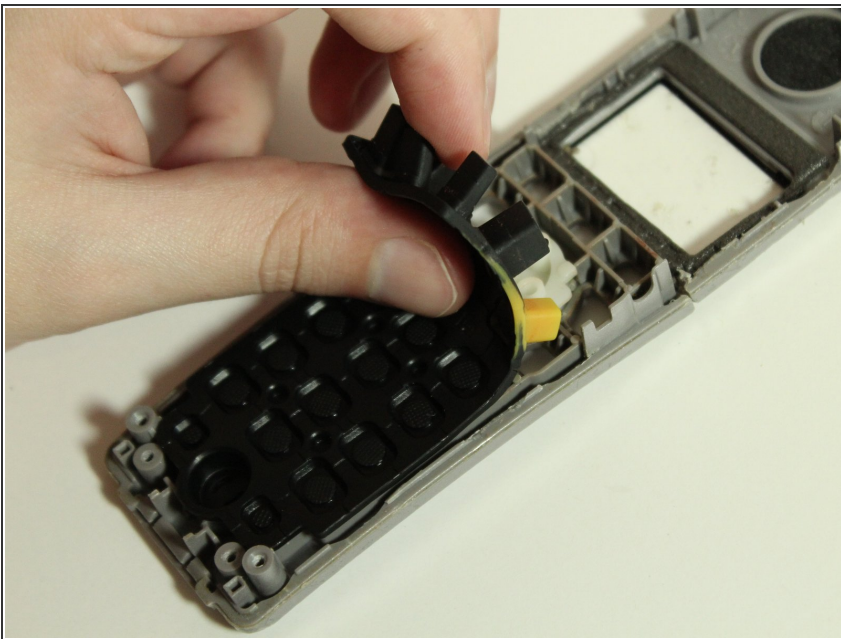

Step 7

- Remove the circuit board.

Step 8

- Pull back the black silicone keypad.

To reassemble your device, follow these instructions in reverse order.
